Yes

Is there anything else you would like to tell us about this plan?

1.11 Any other feedback?

quality of the road surfacing on the road near the Omori boat ramp needs to be addressed. The infrastructure management strategy shows maps for the Western Bays with future development areas. This looks misleading as some of the land is council reserve land. This needs to be corrected and explained.

Strongly Agree

1.5 Taupō North Wastewater

Agree

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

I don't have enough rubbish for a bin and NO bin's for food scraps: too many wild animals like rats and even roaming dogs could get in there and would leave a big mess. Rats could get attracted by the smell and more Rats and other predators would be moving into the area.

At this stage we are trapping predators and happy not to get more of them. Food scraps can attract them all!

1.7 Housing

1.2 Next 10 Years
Do less

What do you think we should do more/less of? (be specific)

The council should be focusing on infrastructure of water sewage roading and rubbish. Not the nice to have things and promotion of the town as general ratepayers aren't affected by these things

1.4 Tūrangi Wastewater
Agree

1.4.4 Agree

Water sewage Roothing and rubbish is the main priority of the council. Stop the wasteful spending of nice to have things.

1.5 Taupō North Wastewater
Agree

1.5.4 Agree

cap of infrastructure is important

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Disagree

Is there anything else you would like to tell us about this issue?

Rubbish bags should be continued to be used as it is the cheaper option to the council . Also Bins will only increase peoples waste and put more burden on the cost to ratepayers

1.7 Housing
Strongly Disagree

1.7.2 Strongly Disagree
Agree

Is there anything else you would like to tell us about this issue?

Council are not property developers. They are there for the purpose of providing infrastructure.

Roading rubbish water and sewage

1.8 Development Contributions
No

Is there anything else you would like to tell us about this strategy?

rates are to provide roading rubbish water and sewage. If we had funds left over other things could be looked at but at this time we don't have spare cash.get rid of debt.

1.9 Community Funding
No

Please explain why you agree or disagree with these changes.

The council needs to be more frugal wasteful spending must stop and debt reduced

1.9.1 Community Q2
No

Please explain why you support or do not support the proposed eligibility and assessment framework.

1.10 Waste management and Minimisation Plan
No

Is there anything else you would like to tell us about this plan?

bins will not reduce the amount of waste. It will actually encourage people to dump more.

1.11 Any other feedback?

cancel must realise the more infrastructure they build the more. The ongoing costs to the town will be generated. And higher rates will be required in the future stop the wasteful spending. It's like a Runaway Train.

Our property is a holiday home at Pukawa, and not occupied on a regular basis. Most users are there for weekends only.

We have had the property for over 50 years, and all users have mostly taken all of their rubbish and recyclables home for disposal.

There is no suitable place to store multiple bins on the property, and they will not be used for their intended purpose as indicated above.

There is absolutely no requirement or need for a multiple bin option for waste and recyclables at our property.

We have a holiday home at Pukawa.

For us the existing system works well. We put out and recover our recycling bins when we are at Pukawa on collection days and put out our rubbish in bags on collection days. If we are leaving before a collection day we either take it home or take it to the Turangi collection site. If the recycling builds up as it does over the holiday period we take to the Omori collection site. We would not use the bins for rubbish as the bin could be left for a number of weeks when we are not at Pukawa creating smell and decay issues. Our rubbish bags are never overweight so do not create health and

safety issues. We have a waste master so have minimal food waste

1.2 Next 10 Years
Agree with the plan

What do you think we should do more/less of? (be specific)

More - encourage residents to compost their food waste and minimise waste in general

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Agree

1.6 Bag it or Bin it
Agree

1.6.4 Agree

I think bins would be the best solution, however this option doesn't encourage residents to minimise their waste quantities (in fact, it encourages them to waste more, and fill their bins to make it worth the rates). the best solution for this would be to charge residents per usage (maybe offer 2 size options for the waste bins for those, like me, who only need to put out their rubbish once every 2 or 3 weeks). Basically a pay-by-use policy. I also think that food waste bins should be optional (my household doesn't have any food waste as we compost 99% of it at home) and residents should be asked to compost at home instead - otherwise those who home compost end up having to pay for those who don't compost at all.

I also think that better communication about how to recycle, and in what conditions (i.e. containers need to be clean), should be done so that the whole community knows what to do. It would be also nice to have some sort of recognition or incentive (vouchers, discounts) to those households that have minimal waste to encourage people to reduce waste amount.

TDC could also consider investing in a composting plant to take food waste to (or having agreements with a company who can compost), and once the compost is ready, selling on such compost for people's gardens to cover part of the cost of the composting process. This would reduce the amount of landfill used for waste.

Soft plastic recycling schemes, and working with companies to encourage use of recyclable packaging (as well as reducing packaging) is also something that could be looked into a bit more.

1.7 Housing

1.10 Waste management and Minimisation Plan
Yes

Is there anything else you would like to tell us about this plan?

I highly encourage the proposal of reducing the use of non-recyclable coffee cups, and think this could be applied to other packaging options such as takeaway packaging etc. Businesses should be encouraged to use more recyclable containers or packaging.

Potentially, could explore having separate food waste bins in town (to separate from landfill)?

Stay with bags - this is user pays.

Wheelie bins may work in the built up areas, if so then let the house holders "buy" their bin - then they will look after it and reduce the cost burden on the council

For less densely populated areas and occasional users with variable amounts of refuse areas the bags are a far better option.

As a suggestion to prevent animals tearing the bags allow rate payers to put them on a hook on their fence - this is apparently discouraged at the moment

Status quo works for current properties that are not occupied year round. The proposed option is not adequate for holiday homes.

An example of how this works in other regions with holiday homes is;

Rubbish - 100L weekly collection

Recycling - 240L fortnightly

Option to opt out of wheelie bin in favour of bags, allocated as one bag per week that you collect annually. Recycling can be collected and disposed of at transfer stations if required.

As Great Lakes has a large number of holiday and holiday rentals, a bagged option and a weekly collection needs to be maintained. If not it will lead to illegal dumping.

Is there anything else you would like to tell us about this issue?

I'm absolutely furious at the prospect of being dictated into housing a wheelie bin at my property - if this is passed I WILL NOT take possession of this bin. If I wish to obtain a wheelie bin for my property I have any number of private companies that can provide me with this service and this holds true for any of the people who supposedly support this idea. This idea is costly, it reduces flexibility & options, it's impractical for many people, it results in rate payers having to store bulky bins at their properties, and I note the suggestion is that in non summer months general residents will only have fortnightly collection of general waste while PAYING MORE for this reduced service.

LEAVE OUR RUBBISH BAGS ALONE - LET PEOPLE CHOOSE FOR THEMSELVES

1.7 Housing
Strongly Disagree

1.7.2 Strongly Disagree
Agree

Is there anything else you would like to tell us about this issue?

The council is not in the business of providing housing stick to the business of providing basic services and let the market get on with its job.

1.11 Any other feedback?

The question in terms of the long term plan states initially council intend to focus on essentials & beyond that gives two options for the future "spend less do less" or "spend more do more". The fact that this is viewed through such a binary lens says everything about the culture within local governments across the country. The idea of doing more with less, as most households and private businesses need to, apparently hasn't even occurred.

We are an older couple living in a semi rural area with a long downward sloping metal driveway. It would be extremely difficult at present and becoming more so as we age to have to drag wheelie bins from our house up the driveway to the gate for collection. At present we can put our black bags and recycling bins into the car and drive them up, this would not be possible with wheelie bins. There are also other elderly folk living in our community who would encounter similar problems. Additionally of the 9 houses in our community 6 are holiday homes so we would be left with the onerous task of returning thier wheelie bins as well as our own.

We have no issue with less frequent collection as only put both general waste and recycling out every 2 - 3 weeks. WE are very strongly in support of retaining the current collection system at lease at the Southern end of the lake in the holiday communities.

We have had a holiday home at Pukawa for 25 years and do not need a wheelie bin or food scraps bin. The additional cost on holiday makers who contribute much to the local economy as is.

We are also in our late 70s and a wheelie bin when used, is difficult to pull up a small hill to the road to empty. Plus large bins would be left on the kerbside until we return to our home perhaps a month or so later. Rubbish bags are gone immediately or taken to the tip as we usually do.

We strongly oppose the introduction of wheelie bins in Pukawa.

1.9.1 Community Q2

No

Please explain why you support or do not support the proposed eligibility and assessment framework.

The proposal should not discriminate for or against specific race or cultures. I'm uncomfortable how parts of the new proposal is put together as there appears to be some virtue signalling involved. All cultures should be acknowledged and respected. I will not support any race based policy as Council is fond of doing. Council must be inclusive of all communities

1.10 Waste management and Minimisation Plan

No

Is there anything else you would like to tell us about this plan?

This district is not in a position to spend \$3m on ghis project and should not be considered until rates are under control.

1.11 Any other feedback?

Has Council considered staff costs in their cost cutting? Can Council explain how the TEL fund will be used in this rates crisis. Will Council be able to satisfy the ratepayers that we are getting value for money, unlike some past projects - especially in the roading and transport area. Will Council clarify the costing of \$5m+ for Iwi relations and its value to ratepayers. Also will Council confirm that Iwi/Hapu are not holding up Council planning/ projects and adding further cost to ratepayers as it appears to be. I do support a number of proposed projects but the timing is wrong. When our rates are close to the cost of inflation then these projects should be revisited.

Is there anything else you would like to tell us about this issue?

bins negatively impact any holiday homes and their residents. Food scrap bins have been tried in other areas of the country, and been a massive failure - I have personally experienced this myself. On windy days the bins blow over and spill contents, and when empty end up on the road as a hazard to vehicles. Food bins also penalize people who already compost

I have a holiday home in Pukawa. The present rubbish system of pay as you go bags works well. Collection day on a Monday fits ideally with weekend stays and means we and other weekend stayers can put bags out on a Sunday night or early Monday and leave, knowing the garbage is picked up and nothing further needs attending to. Currently I only put the recycling bins out if we are staying beyond Monday as I don't expect other people to put my bins back for me. That is the key problem with wheelie bins for rubbish, as if people are only in their houses for the weekend, there is no way for them to bring the bins back onto their property after collection. It is unrealistic to expect other permanent residents to do that job and we should not have to pay a contractor to do that either given that the system we have now does not give rise to that problem. The alternative is that bins will remain along the street, looking messy, getting blown around and perhaps damaged, and advertising that houses are unoccupied, thus risking a higher level of break-ins. The rubbish collection contractors may also be faced with having to deal with many potentially empty bins if they end up being regularly left out after previous collections, which will waste time for them also.

I have observed that Pukawa ratepayers are careful about ensuring rubbish is secured from dogs. In fact it is unusual to have any dogs roaming due to the support for the native bird conservation efforts going on there, so that issue (highlighted in the council's wheelie bin promotional video) is perhaps not as prevalent as it may

be in larger urban areas .

One size does not fit all. I urge you to consider the unique needs of the Pukawa community (and others with a similarly high proportion of temporary residents and holiday homes) and allow those areas to continue to use rubbish bags.

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

Bags work better in areas where the majority of properties are holiday homes. Bins will require someone to return them to each property, or if left out on the road will advertise that owners are not home (risk of burglary) and may blow over, become damaged, and look unsightly lining the streets of the area. Bags currently work well and do not create these problems.

I strongly agree with the wheelie bin proposal.

But, a 120L bin is too small to be collected weekly. Most households produce 2x 60L bags of rubbish per week even with extensive recycling.

A 240L bin is required for fortnightly pick up or a 120L bin for weekly pick up, this is in line with most other councils.

Don't cut us short, or people won't use them correctly or will find a way to abuse them.

1.7 Housing

94% of the properties in Pukawa are holiday homes. The proposal is not practical for holiday owners who generally come and go during public holidays and have to put rubbish out before they go or take it to transfer station. That option would not be practical with bins. So most will have to ignore the system and go the transfer station with bags. You should provide an opt out option like other councils do.

Feedback

1.1 Local Community

Western bays (Omori, Kuratau, Pūkawa, Whareroa)

1.2 Next 10 Years

Do less

What do you think we should do more/less of? (be specific)

Do more infrastructure including water and transport investments.

Do less community facilities and rubbish.

1.4 Tūrangi Wastewater

Agree

1.5 Taupō North Wastewater

Agree

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

I object to proposal this for the Omori and Kuratau area. Most ratepayers in the area do not permanently live there. The wheelie bins will not work in this scenario. Two main issues:

Firstly, most ratepayers visit periodically won't be at their property to bring the wheelie bin in after it has been cleared. This significantly increases the risk of homes being targeted by thieves as vacant properties are easily identified.

Secondly, I generate very little rubbish and only pay for what rubbish I generate. The proposed scheme means I will be subsidising the collection of waste created by others. I find this morally abhorrent given the need for everyone to find ways to reduce waste. Removing user pays and instead using the large proportion of non resident ratepayers to subsidise resident waste creation and collection contravenes UN sustainability goal 12, specifically for " priority attention to be given to waste prevention and minimization":

1.11 Any other feedback?

Water should be metered and user pays in line with recommendations from the New Zealand Infrastructure Commission. User pays would incentivise responsible use, reducing the need for capital projects and improving environment outcomes.

1.1 Local Community
Tūrangi

1.2 Next 10 Years
Do less

What do you think we should do more/less of? (be specific)

stick to basics of clean drinking ester, waste water & Rubbish and minimise costs to ratepayers

1.4 Tūrangi Wastewater
Strongly Agree

1.4.3 Strongly Agree

suggest you keep the current system operable and maintain legislation and standards only.

harpu & iwi wants and wishes nice to have but if your maintaining the outflow within clean legislated standards there is no problem.

if turangi grows then seperation coukd be investergsted to land based discharge.

stick to the current system

1.5 Taupō North Wastewater
Agree

1.5.4 Agree

dont believe seperate consultation with lwi and Hapu shoukd be considered over well general discussion and feedback from everyone in the ratepaying community

at tye end of the dsy its the rate payers who pay and have a vested interest.

not visitors or non paying feel nice enviro groups

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

rubbish collection should be a user pays option.

i can and do minimise my waste by smart purchasing options. I fill a bag once a month if lucky. I recycle and try to minimise my purchases and dont buy non recyclable plastics.

this shoukd remain as a option for user psys and have option to opt out of mandatiry wheely bins.

they have their issues and costs and dosent empower users to recycle or minimise waste.

i have weekly bins in a rental property in the south island where this works well

but for myself living alone isnt needed or wanted or justified.

retain bags or have a user pays only for case by case users who want it.

dont lunk us all in the same bin & make us pay more unnessscerty

1.7 Housing
Strongly Disagree

1.7.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

council should not be involved in commercial or residential housing partnerships.
stick to yjur knitting basics.

if you want council owned housing own it outright for tennants who need this as has been the norm.
dont go into joint partnerships where you dont have the expertise and spend ratepayers money.

1.8 Development Contributions
No

Is there anything else you would like to tell us about this strategy?

if the wster usesge in nee commercisl isnt going to make any changes stick to the existing level & dont change it.

maori land shoukd not have different charges and fees sgainst it. There is no difference between marori owned and non Maori land in selecting fees.

keep them the same without difference.

1.9 Community Funding
No

Please explain why you agree or disagree with these changes.

we are in a recession and changes to the existing policy while in this recession could have poor outcomes.
re evaluate in 3 yrs again if the financial crisis have improved.

1.9.1 Community Q2

No

Please explain why you support or do not support the proposed eligibility and assessment framework.
as above reasoning dont make changes at this time

1.10 Waste management and Minimisation Plan

No

Is there anything else you would like to tell us about this plan?

wheelie bins will not reduce rubbish.

stick to user pays vs Rates based

council along with local government and wellington need to either prioritise recycling of all grades of plastic or reduce and ban items that are not recyclable

as were in a recession generally people will be cutting back on spending - therefore less waste anyway.

im neither here or there on food waste recycling as i use my own worm farm & compost in my garden.

im against kerb bins if this increased my rates.

this should be a opt in or out option also .

remember council will be using outside contractors who have a vested interest financially anyway.

user pays only for kerb food waste bins.

1.11 Any other feedback?

like household spending - council should cut its cloth to suit the economic situation.

buy doing so you will reduce debt and not put extra costs on ratepayers.

if users want something let the users pay.

we all like more but dont like paying for things other than the basics - cut your spending which increases ratepayer costs.

also there is a requirement to ask for a referendum on Māori wards until this is resolved - anything related should be put on hold.

1.6 Bag it or Bin it
Agree

1.6.4 Agree

I agree totally that the current pre-paid plastic bag system should be replaced by a 140L rubbish bin and a food scraps bin. However, the capital costs of supplying each household with a large 240L recycling bin and a glass bin are considerable. Each household currently has a recycling container and a glass container. The contents of these are not a health hazard nor do they blow away. Perhaps a more economic solution would be to continue the status quo for recycling and glass collection for a few more years with weekly collection rather than the capital outlay of providing each household with four new bins rather than two. But in commercial and retail areas, large recycling bins are essential.

1.4 Tūrangi Wastewater

Disagree

1.4.1 Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

If the current treatment process forms the basis of certain environmental issues, spending more on it to 'improve' it is pointless. The degradation caused by the current system will continue as alternatives are not being held as imperative. Finding an alternative that iwi and hapu are supportive of is essential if we are to care for te taiao longterm.

1.5 Taupō North Wastewater

Agree

1.5.4 Agree

Well, we kind of have to now accept the proposed option, given you don't have any other options. The horse has already bolted. Surely it would have been better to have considered appropriate removal of wastewater before further building was proposed and consented. It seems a somewhat blinkered and short-sighted approach has been taken here.

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

Your proposed option assumes a 'one size fits all' approach. I put one rubbish bag out every 3-4 weeks. I do my own composting. My recycling goes out each week. The status quo allows for flexibility around family size,

consumer habits and living styles. The proposed changes do not.

1.7 Housing Agree

1.7.3 Agree

All properties built should be **at a relatively low market price which would be suitable for first home buyers**. There are plenty of properties that have been built for 'the general market'. Many of these sit empty for most of the year as they are second and third 'holiday homes' for people. Taupo does not need any more of these. Taupo has already become too sprawly and has lost its heart.

Feedback

1.11 Any other feedback?

CARPARKS

Due the very high numbers of members attending our competitions and facilities, we struggle to provide car parking spaces and then we have cars parked unsafely.

We would like to have the small carpark behind our pavilion upgraded with either metal or sealed. This is the emergency entrance to and from the courts, where we unfortunately require regular ambulance access. This is also the area where TDC access the facilities.

We would like TDC to consider increasing the size of the large carpark to take up some of the currently unused grass area inbetween netball and the velodrome. This space is rarely used and when it is it is often for large event carparking anyway. Having this car park extended would be beneficial for all events held at OD Park.

COURT COVER

We would find it extremely beneficial to have at least 6 of our courts under cover which would ensure we have the ability to provide netball without the need to cancel games, provide protection from the weather for members and to be able to extend our netball training, competition and development programmes by having protection from the extreme weather.

LIGHTS

We currently only have two of the ten courts with lights, which severely limits how many teams can train at the courts and we are unable to play games under these lights.

The current lights are very old and of poor quality. Recent testing had the light levels at less than half the required quality level to play netball on.

We would have a great need to add two courts with lights to give us a total of four courts with lights, and upgrade the old lights, this would ensure we can train and play without having to use other facilities (many teams have to hire indoor facilities as we do not have enough courts for evening trainings). More lights would ensure we can run extra competitions and development programmes. We have huge issues hiring indoor facilities as they do not have the availability we require and that our teams require for training schedules.

RUBBISH BINS

While there is public park by our courts, unfortunately there are no rubbish bins and we are constantly having rubbish left around our facilities, including used/dirty nappies.

Our staff and volunteers should not have to clean up after the general public.

Please note that this is not rubbish left by our members as we have a group who do our rubbish collection at the end of each competition day. We hire a skip bin during our season and are constantly finding the general public putting their personal and household rubbish in it.

SEATING

While we have managed to install four shelters for our members and their supporters, we simply do not have the funds to put more seating around our courts and are constantly being asked to supply more. Our shelters do not service all courts and still have very limited seating.

We have a large membership that bring along grandparents, parents and siblings, but unfortunately they often have no where to sit.

We would like TDC to consider installing bench seating around some of our courts where there is currently none.

Some of our courts are of a poor to average quality, with them needing maintenance and resurfacing within the next 2 years.

Four courts were resurfaced within the last LTP however have been unsatisfactory and showed immediate issues and have been deemed a slippery surface. These same courts have also been damaged by TDC staff when in 2019 they chose to waterblast them (despite us actually asking for different courts to be cleaned but they chose to different courts due to finals, with no consultation to us so the actual unsafe courts remain uncleaned), the water blasting has removed some of the surface of the courts.

The other courts are of an asphalt surface and need maintenance or resurfacing.
Photos are of the courts in their current condition, as of 2024. full submission attached.

Given we facilitate the only netball competitions within our District (note Turangi/Kuratau do not have competitions and on average only have 1 senior team and 1 school team annually, so they play in the Taupo competition), it is imperative that our facilities are able to provide rate payers with a quality sports venue.

We have photos on the following pages showing the disrepair of the courts and are not duplicate issues, each one is of a different surface issue.

TREES

We have ongoing issues with the oak trees planted around our courts, as they lose their leaves and create a real safety hazard on our courts, as they become wet and slippery. This has been an ongoing issue for many years and despite us requesting removal of the trees in the immediate vicinity of the courts, we have been told they were 'gifts' to Taupo. We do not believe 'gifts' should come before the safety of our members.

We also have concerns on the cost to ratepayers to maintain these trees, as TDC staff spend hours clearing and picking the leaves when they can, this must run at a cost that could be better spent on our venues.

We would like TDC to consider replacing these trees with evergreens as they would make our facilities safer.

CARPARKS

Due the very high numbers of members attending our competitions and facilities, we struggle to provide car parking spaces and then we have cars parked unsafely.

We would like to have the small carpark behind our pavilion upgraded with either metal or sealed. This is the emergency entrance to and from the courts, where we unfortunately require regular ambulance access. This is also the area where TDC access the facilities.

We would like TDC to consider increasing the size of the large carpark to take up some of the currently unused grass area inbetween netball and the velodrome. This space is rarely used and when it is it is often for large event carparking anyway. Having this car park extended would be beneficial for all events held at OD Park.

COURT COVER

We would find it extremely beneficial to have at least 6 of our courts under cover which would ensure we have the ability to provide netball without the need to cancel games, provide protection from the weather for members and to be able to extend our netball training, competition and development programmes by having protection from the extreme weather.

LIGHTS

We currently only have two of the ten courts with lights, which severely limits how many teams can train at the courts and we are unable to play games under these lights.

The current lights are very old and of poor quality. Recent testing had the light levels at less than half the required quality level to play netball on.

We would have a great need to add two courts with lights to give us a total of four courts with lights, and upgrade the old lights, this would ensure we can train and play without having to use other facilities (many teams have to hire indoor facilities as we do not have enough courts for evening trainings). More lights would ensure we can run extra competitions and development programmes. We have huge issues hiring indoor facilities as they do not have the availability we require and that our teams require for training schedules.

RUBBISH BINS

While there is public park by our courts, unfortunately there are no rubbish bins and we are constantly having rubbish left around our facilities, including used/dirty nappies.

Our staff and volunteers should not have to clean up after the general public.

Please note that this is not rubbish left by our members as we have a group who do our rubbish collection at the end of each competition day. We hire a skip bin during our season and are constantly finding the general public putting their personal and household rubbish in it.

SEATING

While we have managed to install four shelters for our members and their supporters, we simply do not have the funds to put more seating around our courts and are constantly being asked to supply more. Our shelters do not service all courts and still have very limited seating.

We have a large membership that bring along grandparents, parents and siblings, but unfortunately they often have no where to sit.

We would like TDC to consider installing bench seating around some of our courts where there is currently none.

Some of our courts are of a poor to average quality, with them needing maintenance and resurfacing within the next 2 years.

Four courts were resurfaced within the last LTP however have been unsatisfactory and showed immediate issues and have been deemed a slippery surface. These same courts have also been damaged by TDC staff when in 2019 they chose to waterblast them (despite us actually asking for different courts to be cleaned but they chose to different courts due to finals, with no consultation to us so the actual unsafe courts remain uncleaned), the water blasting has removed some of the surface of the courts.

	Taupo Netball Centre - Submission

TDC 2024 LONG TERM SUBMISSION

ABOUT US

- ❖ Taupo Netball Centre has been established since 1953 and is one of the leading sports in the Taupo District with over 1800 members plus its many, many umpires, volunteers and supporters.
- ❖ Taupo Netball Pavilion is situated at Owen Delany Park with 10 netball courts, 1 practice half court and a children's play area.
- ❖ Taupo Netball Centre provides all the local netball services and competition for the Taupo, Turangi, Reporoa and surrounding areas
- ❖ An Operations Manager who is vital to netballs success, is employed for 22.5 hours per week per annum to manage the day to day running of the netball Centre. This role also works alongside other sporting bodies to assist in planning, training and communication to benefit the wider community, made possible through our office as a part of the Taupo Sport House.
- ❖ We employ a part time Coach Development Manager, who ensures our coaches are getting the very best development and follow the Netball NZ philosophies and programmes

2024 MEMBERSHIP

◆ FUTURE FERNS PLAYERS – Y1 & Y2	35 players
◆ FUTURE FERNS PLAYERS - Y3 & Y4	103 Players
◆ FUTURE FERNS PLAYERS – Y5 & Y6	144 Players
◆ FUTURE FERNS PLAYERS – Y7 & Y8	180 Players
◆ COLLEGE TEAMS	168 Players
◆ SENIOR WOMENS TEAMS	216 Players
◆ SENIOR MIXED LEAGUE TEAMS	576 Players
◆ COACHES & MANAGERS	180
◆ UMPIRES	40
◆ VOLUNTEERS	20
◆ TOTAL MEMBERSHIP FOR 2024	1662

PLEASE NOTE THESE ARE FULL MEMBERS WHO HAVE PAID AFFILIATION FEES TO TAUPO NETBALL CENTRE, NWBOP & NNZ

Teams supporting our annual fluoro fun day

COMPETITIONS & PROGRAMMES

- ❖ **MIXED INDOOR NETBALL** – 48 Mens & Womens mixed teams compete in 3 grades for 12 weeks throughout the year
- ❖ **ANZ FUTURE FERNS** – Students that are Year 1 – 8 complete the 8 – 10 week new Netball New Zealand junior programme. Y1 & Y2 are on Tuesdays and the others are on Saturday mornings.
- ❖ **SENIOR COMPETITION** – All College School teams and Senior women's teams compete in a 12 week Saturday afternoon competition
- ❖ **REPRESENTATIVE TEAMS** – Taupo Netball Centre has Under 14, Under 16 and Under 18 teams who compete in nationally held representative tournaments. Our teams achieve highly at these tournaments, especially given we are deemed a small centre within our region and nationally.
- ❖ **NNZ PLAYER DEVELOPMENT PROGRAMME**- A programme designed for Y7 & Y8 players and is held for 6 weeks each year
- ❖ **UMPIRE WORKSHOPS** - Theory and practical workshops are held 2 – 3 times each year to educate and upskill umpires and those interested in becoming umpire
- ❖ **COACHING WORKSHOPS** - These are run throughout the year with the assistance of Netball Waikato Bay of Plenty

OUR FACILITIES

COURTS

Our Centre has 10 full courts and one half warm up court, with the assistance of Taupo District Council we work towards ensuring our courts are of good quality for our competitions and tournaments.

LIGHTS

We have two courts that have lights suitable for training only.

SHELTERS

We installed four outdoor shelters for our members to use.

OUR PAVILION

PAVILION

TNC fully funds all maintenance and upgrades to the pavilion. We are constantly striving to provide a good quality facility for our members and the local community.

In 2023 and 2024 major upgrades have been ongoing with our pavilion, recladding the exterior of one half of the building. This has been a four stage process as funds become available, with three stages being completed a total cost of \$115,000 so far and with stage four still to be completed.

FUTURE PROJECTS

- Recladding stage four
- Over roof over the main deck for shelter
- Drinking fountain
- Interior painting
- Deck safety slip strips

OUR SUBMISSION FOR SPORTS FACILITY SUPPORT

COURTS

Some of our courts are of a poor to average quality, with them needing maintenance and resurfacing within the next 2 years.

Four courts were resurfaced within the last LTP however have been unsatisfactory and showed immediate issues and have been deemed a slippery surface. These same courts have also been damaged by TDC staff when in 2019 they chose to waterblast them (despite us actually asking for different courts to be cleaned but they chose to different courts due to finals, with no consultation to us so the actual unsafe courts remain uncleaned), the water blasting has removed some of the surface of the courts.

The other courts are of an asphalt surface and need maintenance or resurfacing.

Photos are of the courts in their current condition, as of 2024.

Given we facilitate the only netball competitions within our District (note Turangi/Kuratau do not have competitions and on average only have 1 senior team and 1 school team annually, so they play in the Taupo competition), it is imperative that our facilities are able to provide rate payers with a quality sports venue.

We have photos on the following pages showing the disrepair of the courts and are not duplicate issues, each one is of a different surface issue.

COURTS

ASPHALT COURTS - SURFACES ARE ADEQUATE BUT NEED CLEANING AND REMARKING

OUR SUBMISSION FOR SPORTS FACILITY SUPPORT

LIGHTS

We currently only have two of the ten courts with lights, which severely limits how many teams can train at the courts and we are unable to play games under these lights.

The current lights are very old and of poor quality. Recent testing had the light levels at less than half the required quality level to play netball on.

We would have a great need to add two courts with lights to give us a total of four courts with lights, and upgrade the old lights, this would ensure we can train and play without having to use other facilities (many teams have to hire indoor facilities as we do not have enough courts for evening trainings). More lights would ensure we can run extra competitions and development programmes. We have huge issues hiring indoor facilities as they do not have the availability we require and that our teams require for training schedules.

CURRENT LIGHTS ON COURTS 1 & 2

PROPOSED NEW LIGHTS ON COURT 3 & 4

OUR SUBMISSION FOR SPORTS FACILITY SUPPORT

COURT COVER

We would find it extremely beneficial to have at least 6 of our courts under cover which would ensure we have the ability to provide netball without the need to cancel games, provide protection from the weather for members and to be able to extend our netball training, competition and development programmes by having protection from the extreme weather.

OUR SUBMISSION FOR SPORTS FACILITY SUPPORT

CARPARKS

Due to the very high numbers of members attending our competitions and facilities, we struggle to provide car parking spaces and then we have cars parked unsafely.

We would like to have the small carpark behind our pavilion upgraded with either metal or sealed. This is the emergency entrance to and from the courts, where we unfortunately require regular ambulance access. This is also the area where TDC access the facilities.

We would like TDC to consider increasing the size of the large carpark to take up some of the currently unused grass area inbetween netball and the velodrome. This space is rarely used and when it is it is often for large event carparking anyway. Having this car park extended would be beneficial for all events held at OD Park.

PAVILION CAR PARK & EMERGENCY ENTRANCE

PROPOSED EXTENDED CAR PARK AREA

OUR SUBMISSION FOR SPORTS FACILITY SUPPORT

TREES

We have ongoing issues with the oak trees planted around our courts, as they lose their leaves and create a real safety hazard on our courts, as they become wet and slippery. This has been an ongoing issue for many years and despite us requesting removal of the trees in the immediate vicinity of the courts, we have been told they were 'gifts' to Taupo. We do not believe 'gifts' should come before the safety of our members.

We also have concerns on the cost to ratepayers to maintain these trees, as TDC staff spend hours clearing and picking the leaves when they can, this must run at a cost that could be better spent on our venues.

We would like TDC to consider replacing these trees with evergreens as they would make our facilities safer.

OAK TREES TOO CLOSE TO COURTS

OAK TREES TOO CLOSE TO COURTS

OUR SUBMISSION FOR SPORTS FACILITY SUPPORT

SEATING

While we have managed to install four shelters for our members and their supporters, we simply do not have the funds to put more seating around our courts and are constantly being asked to supply more. Our shelters do not service all courts and still have very limited seating.

We have a large membership that bring along grandparents, parents and siblings, but unfortunately they often have no where to sit.

We would like TDC to consider installing bench seating around some of our courts where there is currently none.

MOST USED COURTS – NO SEATING

1 OF THE 4 SHELTERS WE BUILT

OUR SUBMISSION FOR SPORTS FACILITY SUPPORT

RUBBISH BINS

While there is public park by our courts, unfortunately there are no rubbish bins and we are constantly having rubbish left around our facilities, including used/dirty nappies.

Our staff and volunteers should not have to clean up after the general public.

Please note that this is not rubbish left by our members as we have a group who do our rubbish collection at the end of each competition day. We hire a skip bin during our season and are constantly finding the general public putting their personal and household rubbish in it.

PUBLIC PLAYGROUND WITH NO RUBBISH BIN

Taupō

1.2 Next 10 Years
Do more

What do you think we should do more/less of? (be specific)

It is never going to be cheaper than today, brave visionaries see a need and build it - please future proof as much as possible of the infra structure as you can, think and plan ahead.

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Disagree

1.5.1 Disagree
Disagree

Is there anything else you would like to tell us about this issue?

Assuming there will be continuous growth in the North Taupo area there will guaranteed need to be fully capable sewerage treatment in the North Taupo.

Be Brave and build it now! - it will never be cheaper. Burdening the existing treatment plant will surely cause problems up ahead, build resilience in the system with a two way flow between the two treatment plants.

1.6 Bag it or Bin it
Strongly Agree

1.6.3 Strongly Agree

We have recently moved from Tauranga who uses the proposed version of rubbish collection. after an initial settling in phase it works really well.

I feel that we have gone back decades here, I am concerned with the volume of kitchen scraps etc that I put to landfill, also concerned with putting out rubbish on windy days and animals foraging through the bags, Bring In the Bins Please

1.7 Housing
Strongly Agree

1.7.4 Strongly Agree

Again be brave and future proof the development - be the first in New Zealand, build for longevity - not the New Zealand short term version. Think of green energy - solar, you are in a special natural native environment. I draw your attention to the Newington Village built in Sydney 2000. They innovated and chose to build solar energy into the homes at the point of construction;

<https://www.ceem.unsw.edu.au/sites/default/files/uploads/publications/NewingtonReport-mainsmall.pdf>

Secondly - you are actively making use of the gullies to creative bio diversity which is awesome - how/what/when will TDC do to protect the native birds that you are encouraging to the gullies. Petwise the proposed housing will not be the best place for dogs so many people will choose cats!! It is really the time and wise to consider what to do with cats in order to protect native birds. I draw you to one of many studies; <https://www.nzherald.co.nz/lifestyle/cat-tracking-study-an-eye-opener-for-owners/2Y53ECMIPCUQMPNU5V2ZZ4XEAM/>

1.8 Development Contributions
Yes

Is there anything else you would like to tell us about this strategy?

1.9 Community Funding
Yes

Please explain why you agree or disagree with these changes.

1.9.1 Community Q2
Yes

Please explain why you support or do not support the proposed eligibility and assessment framework. Keep the benefits of the use of the funds with in the Taupo area

1.10 Waste management and Minimisation Plan
Yes

Is there anything else you would like to tell us about this plan?

1.11 Any other feedback?

I congratulate TDC on your energy and enthusiasm - we are Tauranga refugees - we have seen the consequences of low ambitions in local council

1.2 Next 10 Years

Agree with the plan

What do you think we should do more/less of? (be specific)

1.7 Housing

Agree

1.7.3 Agree

I agree with developing cheaper houses but also think Council should be trying to pay off debt.

1.11 Any other feedback?

I am a resident in Mangakino and used to use the Lake front quite a lot (multiple times a week), to socialise. Lately I haven't been able to go because there is no cafe there now. I'd like the Lake front development to go ahead and see it restored to how it was. I want a coffee cart or cafe there, more table and chairs on the reserve, smooth path to get there as I have a mobility scooter. I have to go on the road for part of it. I feel strongly about this as I miss the sense of community we had at the lakefront.

1.6 Bag it or Bin it
Disagree

1.6.1 Disagree
Agree

Is there anything else you would like to tell us about this issue?

I oppose the new roadside recycling/rubbish scheme, proposed by Taupo District council for the Omori/Kuratau area. The reason for this is that this area is mainly a holiday house area and the current system, works well for this area. There is not the constant population to sustain the proposed scheme, "if it aint broke, why fix it?" and the change to the scheme will increase the already high component of our rates. It will also look unsightly with bins lining the roads as they will be put out for a long period of time until picked up as this is a holiday area. This is why I'm opposed to the new scheme.'

Subject: RE: Have your say on the future of community funding

Caution: This email originated from outside of the organisation. Do not click links, open attachments, or respond unless you recognise the sender and know the content is safe.

Kia Ora Angie,

It looks okay to me the only feedback I would add is in the framework community supports, a questions could be asked is how long has the service been operating within our area and is there an existing rapport, if so what? What I tend to find with changes we don't actually know how these work until we start using it.

Annually is fine, it would be awesome if it was twice in a calendar year too apply however I understand this is dependent on the amount of putea available.

Other pātai:

- Should we bag it or bin it? What's the future of our kerbside rubbish and recycling collection? Bag seems tidier, however unsure how affordable this is for those whanau who do struggle, what is the status for rubbish being dumped around town or in hidden places, how do we minimise this from happening?
- Should we focus most of our effort and money on essential services? Sorry unsure what this means?
- Should we use land we own to help ease the district's housing crisis? Absolutely, isn't it everyone who has the potential to support any crisis to do what they can example: if TDC have the whenua and we can provide relocatable houses then with the partnership we can assist with the housing crisis.
- How should we deal with Taupō's wastewater on the northern side of the Waikato River, and wastewater in Tūrangi? I don't know much about this however: is what we are doing now working? If not why not? What needs to change? What is iwi's contribution or responsibility to wastewater? I can only assume that Tuwharetoa are the kaitiaki of our wai, who is this?

Is there anything else you would like to tell us about this issue?

The current system of using bags for rubbish (essentially pay as you go) works well. Given the high numbers of holiday homes in the area a move away from this would mean those homes subsidizing the rest of the rates base.

This is already the case with most other services provided for by Council and the burden should not be added to.

With regards recycling the current system was working well, however. I noted a more intolerant approach adopted by the councils' officers.

In prior years holiday makers (again using the service for a few weeks a year only) would have larger overflow recycling collected – I would use an old milk carton and split the metals and cardboard into this and bottles into the official bin. Only the official bin was emptied.

This is short sighted in my view, and again fails to recognize the contribution made by owners of holiday homes in the region.

Re: Waitetoko Rd – No Exit Road

Background.

Waitetoko Road is adjoined to State Highway 1 (SH 1) at Waitetoko, Mission Bay.

This section of SH 1 road now has a 60 kilometre an hour (kph) speed restriction due to the residential activity and multiple driveway access to SH 1.

Waitetoko Road is a residential street with 7 permanent residents and the remaining houses being predominantly holiday homes.

There is no speed restriction on this short No Exit Road.

Submission.

That a speed limit of 30KPH be applied to Waitetoko Rd.

The main road speed limit is 60kph.

There is no such speed restriction of any kind on Waitetoko Rd.

Reasoning.

This street is quiet most of the year.

At holiday weekends and over the summer, it is a busy street.

Many vehicles/boats etc. are parked on the road as houses and properties fill up and are used by holiday makers.

This alone can make access and visibility difficult.

There are – of course – many children around at these times.

Vehicles, including buses and campervans, use this road seeking access to the lake.

Larger vehicles do have trouble turning around as the turning circle is tight and exacerbated by the extra vehicles often parked on the street.

Once turned around – the mission of most vehicles seems to be to get back to SH 1 as fast as possible.

Excessive speed by non-residents is of real concern.

Safety.

This is a safety issue for residents, and their children, who are often playing on sections adjacent to the road.

It would reflect very badly on the Taupo District Council if there was to be a serious injury or fatality on this street due to there being no speed restriction at all.

1.6.4 Agree

I know that TDC is working hard to promote wheelle bins in the area, however I don't see how this is going to work in Kuratau where the majority of properties are holiday homes .The current system works well for us & has done for the last 34 years !!!! I can see how wheelle bins will work well in built up residential areas ,where the majority of homes have full time residents but it will not work in areas where the majority are unoccupied holiday homes .The streets of Kuratau will become totally over loaded with deserted wheelle bins as the property owners have returned home before the bins have been emptied. Who will be putting all the bins away ????? They will be hazardous when left on the footpaths (& the roads) for extended periods . Also if the lids are left off when emptied they will fill up with water when it rains. We have no permanent residents in our street so probably wont use the bins if we aren't there to bring them back inside our property, so will end up paying again to drop our rubbish at the Turangi refuse station , a case of double dipping for the council - charge use for rubbish collection on our rates & then again at the refuse station. I'm sure the council has already made up its mind re the bins, but it should listen to what the rate payers in Kuratau & surrounding areas are saying - 1 system doesn't fit/suit all. Owners of holiday homes make a huge contribution in the Taupo region.

Feedback

1.11 Any other feedback?

The Waipahihi Botanical Society Inc. (Society) have previously made submissions to Taupo District Council (TDC) regarding two projects within the Society Reserve which have been positively recognised and supported by past and present TDC Councillors.

Projects TDC have committed to which will require funding within the next eight years are:

Connecting the Public Toilets within the Reserve to the Council Sewerage System. This is a priority issue and draft plans to make the connection have been completed awaiting final funding approval. TDC have already paid to have the toilets unblocked this past summer after an effluent overflow was noted - a health hazard to all users of the Reserve.

Assisting with finance to resurface the roadway that allows users to drive around the Reserve. Distance approximately 1.7km. It is nearly 25 years since the road was last resealed and during the next 7/8 years it will require attention. At the present time the road is satisfactory for every-day use but some edges are crumbling and parking areas need a permanent surface. (The cost of this project is unknown, however, the Society would appreciate TDC negotiating a contract with a reputable roading contractor to complete the task.)

TDC agree the sewerage connection is a priority and indicated a completion date during 2023.

The Society trust the roadway expense has been diarised to take place during the early 2030's. Waipahihi Botanical Society Inc. await a Taupo District Council positive response to this reminder

The issue of having a wheelie bin for rubbish at our Omori holiday home relates to returning this bin onto the property on the Monday when we leave the home Sunday night, we definitely prefer the rubbish bags to remain as is.

Recycling is not an issue, we often bring this home for recycling and also rubbish, or leave the recycling on site until we are next there on a Monday which is very occasional.

Would you like to present your submission in person at a hearing?

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Local Community
Taupō

1.2 Next 10 Years
Agree with the plan

What do you think we should do more/less of? (be specific)

Continue to be proactive to engage with the community. I have just moved to Taupo from Tauranga where it was a struggle to see that active engagement. We have attended the Affordable homes site visit this week and will be attending the waste water walk around plus others.

1.4 Tūrangi Wastewater
Strongly Agree

1.4.3 Strongly Agree

Continue to strive for viable options to ensure the waste water untreated does not reach the beautiful Taupo lake. We don't want another Lake Rotorua

1.5 Taupō North Wastewater
Strongly Agree

1.6 Bag it or Bin it
Strongly Agree

1.6.3 Strongly Agree

Having lived in Tauranga until very recently, I strongly recommend adopting the wheelie bins. After a short settling in period the bins system in Tauranga has work extremely well. Better for the environment and far safer for the refuse employees working with wheelie bins than the current situation

1.7 Housing
Strongly Agree

1.7.4 Strongly Agree

I attended the site visit held on Monday and am impressed with the intent of the development. Please

consider solar panels for those homes. Firstly to attract the new affordable homes and to assist with lower outgoings on their electricity bills. No better time to fit and most economical if purchased in bulk and installed during construction.

Investment in the surrounding gullies for improving the native flora is to be congratulated, however they will attract the native birds and they will need protection from cats. Please seriously consider a no cats policy for this development. It has been categorically proven that cats are the worst predator see link and department of conversation data for NZ

<https://www.theguardian.com/world/2022/apr/07/new-zealands-cats-are-decimating-native-wildlife-should-they-be-treated-as-pests>. Also please consider ENDURING covenants on the development that would include limiting quality materials/colour systems for new build and subsequent owners.

1.8 Development Contributions

Yes

Is there anything else you would like to tell us about this strategy?

1.9 Community Funding

Yes

Please explain why you agree or disagree with these changes.

Because no development will be more economical to do and achieve than today. Do not delay and or postpone -it will be disastrous just look at Tauranga.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

I encourage you to look after the Taupo community its police/nurses and teachers they are the life blood of our community

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

Be bold, nothing ventured nothing will be gained. Thank you

1.5.4 Agree

I think the council should stop making short term plans and focus on long term solutions. short term dies nothing but cost more money which means rate payers pay more. Thats just not acceptable at present times.

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Agree

Is there anything else you would like to tell us about this issue?

if you are going to impose the food waste on people. It should be a choice and those people that choose it can agree to pay for ut. But there are many that simply won't want it be ause they can not afford it. Cost changes should not be forced at such a stressed finacial time.

1.7 Housing
Agree

1.7.3 Agree

If you have left over funds from previous allocated projects. There should be no need for rates increases. Maybe pushing pause to enjoy what we currently have and working on that instead of constantly trying to replace.

1.11 Any other feedback?

the biggest thing we are hearing in our community and in NZ is that people are struggling financially. So kept the increase at 0 or small as possible to help keep families in their own homes. And maybe provide optional services with costs to people who choose it.

Disagree

1.6.1 Disagree

Disagree

Is there anything else you would like to tell us about this issue?

Like the idea of wheelie bins, but don't like the extra costs associated with it. Why on earth is it so expensive?

1.7 Housing

Strongly Disagree

1.7.2 Strongly Disagree

Agree

Is there anything else you would like to tell us about this issue?

Why not sell the land and let people with the right skills develop the land accordingly. Off course, need the right restrictions and infrastructure to help.

I.e. housing could be more affordable if an entire sub-division could be geo-teched together, rather than individual sections. Plus requiring every section to have it's own stormwater soakpit is silly, why not allowed underground infrastructre to be joined (better economy of scale).

1.8 Development Contributions

No

Is there anything else you would like to tell us about this strategy?

Why create boundaries between north/central/south? Will make building/development harder of more expensive dependant of which side of the road you are on in some place. A universal "town" calculation would be fairer.

1.9 Community Funding

No

Please explain why you agree or disagree with these changes.

Too complicated to understand. Policy should be clear and simple for all users to understand

1.9.1 Community Q2

No

Please explain why you support or do not support the proposed eligibility and assessment framework.

Vision is too vague and not specific to funding framework.

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

1.11 Any other feedback?

Way too hard to provide feedback, I fear most of the community will not provide feedback because questions are too closed, because wrong type of information provided, and most importantly because most people seem to think council won't listen and will just do what they want to do anyway.

Do less

What do you think we should do more/less of? (be specific)

Unnecessay roading projects like the round about at Huka Falls and expensive lighting on the Lake front.

The new bridge over the Waikato wont ease the congestion in town so other solutions need to be considered how traffic is bottle necke.

Christopher Luxon said there would be private/buiness investment opportunities that Councils can secure rather than it all be at the cost of rate payers to upgrade legislated water upgrades. Has this been fully explored before burdening rate payers.

Agree

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

We are a low waste household, we would be penalised for our efforts with bins being charged through rates. We currently use 1x black rubbish bag equivalent every 6 weeks. Each household should pay for their rubbish disposal in line with their quantity.

Food waste collection is a positive move forward, it will help reduce household rubbish.

I can not understand why you would want to have wheelie bins in a holiday bach area as omori and Kuratau these bins will end up a danger on the roadside they are put out when people leave their bach or rental bach and are not removed from the road side until the house is occupied again becoming a real hazard . To say that option two will generate more rubbish is an unfounded opinion and probably the opposite to what the wheelie bins will do.

The wheelie bins are basically unworkable in a bach situation

What do you think we should do more/less of? (be specific)

Don't build a new bridge. Build an over bridge on ramp where the lights were installed on the north west of the Waikato. Lights just cause conjection. Widen the up hill section to 4 lanes from the bridge to Poihipi rd and install the overbridge to Acacia bay. Later, if required build an overbridge to Poihipi rd. Don't call depreciation a cost, its a book adjustment, not an actual expense. Interest is a direct cost. Tender jobs out and cut red tape to reduce capital and maintenance expenditure. Iwi and Hapu can put themselves up for election to council. Stop beating around the bush and using Iwi and Hapu as an excuse for unrealistic infrastructure budgets.

1.4 Tūrangi Wastewater

Is there anything else you would like to tell us about this issue?

rural which are near to residential boundaries should be allowed to drop off bags at road drop points. This is currently done in residential Kinloch.

1.7 Housing

Strongly Disagree

1.7.2 Strongly Disagree

Agree

Is there anything else you would like to tell us about this issue?

The community (council) does not have to build cheap low quality houses for first home buyers. What council need to do is remove red tape for building consents and allow general house to be constructed more economically. Selling council land is dumb. Partner with commercial companies to build affordable flats which council own and rent out. Build connected flats on smaller lots away from general housing and don't sell land. Taupo needs open spaces

I would prefer not to change from refuse bags to bins, the bags are cheaper and more convenient, the bins are expensive and an eyesore on both collection day and many other days due to being left out, thrown around by vandals or tagged.

Western bays (Omori, Kuratau, Pūkawa, Whareroa)

1.2 Next 10 Years

Agree with the plan

What do you think we should do more/less of? (be specific)

Focus on infrastructure like water, sewerage, recycling, rubbish collection.

Rather than nice to do feel good projects that give little return for rate payers.

Is there anything else you would like to tell us about this issue?

We are in Kuratau and the idea of bins for a holiday are is just stupid as there'll be bins kept out when residents or renters leave the sea and they'll be littering the streets.

The current system of bags for rubbish and small bins for recycling works really well.

The Alternate Option is th only logical system for a high holiday house area.

I would like to make a submission regarding introducing wheelie bins to Pukawa. Many of us are bach owners who leave our rubbish and recycling out to be collected. The system works. Bins would be left out with this new system leaving them up to residents to deal with.

Just to give some feedback on bins vs bags for Pukawa.

We have wheelie bins here in Martinborough. It's an absolute disaster because;

- Bins are of weak plastic design and are constantly broken by the trucks, lids get ripped off and rubbish blows around
- They blow over (very top heavy) when there is a moderate (not just strong) wind, total mess around town on rubbish day
- Ongoing confusion on how to position bin near kerb so that truck can pick them up

It's a concept that involves no physical work by the local council during rubbish pick up day, yet the work has been shifted back to the ratepayers (often easier to just take rubbish to the tip yourself).

Bags are a much more simple and better solution.

What do you think we should do more/less of? (be specific)

Wastewater and drinking water. Road safety and building infrastructure should be priority.

At least in Motuoapa and othe places with a lot of holiday homes stick with the bagged rubbish for now. Great idea to have food waste separate and fortnightly collection.

also would be fine with reduced mowing and gardening if that saves money.

I don't like councils selling community land. You can't get it back once you sell it and is 42 new homes going to make much of a difference or just line a developers pockets.

If I had to choose between two then the first option is better. Ensuring good quality affordable housing for people is important.

Is there anything else you would like to tell us about this issue?

I would not like to see large rubbish bins provided by the Council.

At the moment if we leave for home late on a Sunday we can put a bag of rubbish out to be collected the next day. If we have to use bins we will have to ask a permanent resident to put the empty bin around the back of our property after it's been emptied. The Kinloch refuse transfer station closes early on a Sunday afternoon, so we can't leave rubbish there late in the day.

There are about 50 houses in our Kinloch street and only 2 permanent residents. Sometimes they are both away.

In the Taupo District there are a lot of holiday homes, so this would be a big problem for a lot of people.

I wish to make a submission relating to the possible introduction of wheelie bins at Pukawa.

There is a local campaign urging pukawa residents to oppose new bins. I support new wheelie bins:

1. The most important issue is to promote waste reduction and recycling.

2. Our experience at home in Lower Hutt is that the new bins are fine. They will help deal with the issue of dogs spreading the current bags of rubbish along the Pukawa street and wind blowing recycling material away.

Morning

As you are aware Pukawa bay is mostly holiday homes.

We do not want wheelie bins but stick to what we have already.

It would not work for us

The convenient of bags picked up weekly works for us as opposed to wheelie bin pick ups of fortnightly which would not

Wheelie Bin Proposal

My family and I are holiday house owners of XXXXXXXXXX. We have owned the property since 2008.

I wish to express my concern about the proposal to introduce wheelie bins in the Pukawa settlement. In my view this would not be a wise step.

In Auckland where we reside, our 4 bins (green waste, compost, general and recycling) work very well as residents are present on a regular basis to put the bins out and retrieve them post collection.

In Pukawa there are just a small number of permanent residents, some are elderly, and it would not be appropriate to expect them to relocate bins to a holiday property after the Monday collection when holiday makers have returned home. Bag collection works well currently and is more easily managed by Bach Care/AirBnb renters and owners.

We are regular users of the Turangi and Omori/Kurutau refuse stations where we drop off our recycling. We do not use a kerb side box as we are not always present to retrieve it.

I urge the council to thoughtfully consider the unique needs of Pukawa and the other small settlements in the Taupo District in favour of retaining the current rubbish bag/sticker alternative.
