Eastern bays (Hātepe, Motutere, Motuoapa, Tauranga-Taupō)

1.2 Next 10 Years

Do less

What do you think we should do more/less of? (be specific)

Wrong options. I agree with the plan provided the 'Bag it or Bin it " options are amended to recognise the interests of the many holiday home owners who own properties in our area. See section 6 below.

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Disagree

Is there anything else you would like to tell us about this issue?

The residents of Waitetoko, Te Rangi-ita and Tauranga-Taupo use their properties for long weekends, school holidays and, if retired, for occasional weeks at a time. At the end of their stay the rubbish bags and bins are put out on the street for collection. The bins are usually collected and brought back onto the property by the person who mows the grass and maintains the property—if there is such a person, otherwise they stay on the street until a kindly neighbour assists.

So to avoid the situation where the proposed new bins sit on the roadside for weeks on end the current prepay bag system must be retained as well

If the proposed collection arrangement is to be altered problems will arise for those who stay for say ten days—when they put out their bin for collection it will inevitably contain both food scraps and rubbish as not enough time will have elapsed to allow for one collection for food scraps and another for rubbish. So if the council wants to separate the rubbish at point of collection a bin and a bag will be required.

Hello,

We understand that consideration is being given to introduce Wheelie Bins into the rubbish collection system for Pukawa.

As you know this village is mostly unoccupied holiday homes; at last count there is fewer than a dozen permanent residences in Pukawa yet there are some 220 houses.

Current practice is for rubbish bags and recycling bins to be "put out" for collection on Mondays where property owners chose to dispose of their household rubbish in that fashion. Our own practice is to take our rubbish home with us and only use the recycling facility at Omori when the bottle bin gets a bit high.

We cannot see any merit in a proposal to litter the place with bins. There is a very good chance that if bins are put out for collection they will stay on the roadside until the next time a property owner is back in Pukawa. It is unreasonable to expect that a few elderly owners should wheel empty bins back inside the property of those owners who are not there to do so.

I am aware that in similar villages (eg Whareroa) with similar unoccupancy levels big bins are supplied at some central point in the village. Why cannot recycling arrangements mirror this practice?

As for household rubbish, why can't we continue with the current practice of using bags?

For our part we have rarely seen any problems associated with the current arrangements. So if it ain't broke what is the problem that Wheelie bins are intended to fix?

Proposal to move to wheelie bins for Pukawa

As a long time house owner in Kuratau and Pukawa can we please lodge our NON SUPPORT for the proposed wheelie bins. We are already forced to pay and contribute to a raft of facilities and services that we never use across the Taupo region. We don't require a bin or the related costs over the 12 months. We own a holiday home which means we only required rubbish collection a few times a year.....we also would have no way to recover the bins as we are often not there after the rubbish is collected

Please focuses the use of rates on things that will make a difference – less fluff and more core services.

1.1 Local Community

Western bays (Omori, Kuratau, Pūkawa, Whareroa)

1.6 Bag it or Bin it

Strongly Disagree

1.6.1 Disagree

Agree

Is there anything else you would like to tell us about this issue?

I am writing to express my strong opposition to the Council's plan to replace the current weekly rubbish bag collection with wheelie bins. As a holiday home owner in Pukawa I am deeply concerned about the implications of this change, both financially and practically.

First and foremost, the introduction of wheelie bins represents an unnecessary expense that would be added to our rates. As someone who is not permanently residing in the district, the cost of these bins is an unwarranted financial burden. It seems unreasonable to impose such costs on holiday homeowners who are not consistently using the waste collection services.

Moreover, the current system of rubbish bag collection provides the flexibility needed for holiday home owners. We can manage our waste based on our presence in the district, ensuring that we only pay for what we use. Introducing wheelie bins would disrupt this system, forcing us to pay for a service we do not use regularly. This is particularly inequitable given that we already contribute to the local economy through rates and other expenditures.

In addition to these financial concerns, I am fully capable of managing my waste responsibly. I consistently compost my food waste, which significantly reduces the amount of rubbish needing collection. For other waste, I am more than willing to take it to the transfer stations in Turangi or Omori when I am in residence.

This approach is not only cost-effective but also environmentally responsible, aligning with sustainable waste management practices.

In a democratic society, it is crucial to offer residents options rather than imposing blanket policies that do not consider individual circumstances. The current proposal to introduce wheelie bins lacks the flexibility and consideration for diverse needs within the community. I strongly urge the Council to reconsider this plan and provide an option for residents to continue using the current rubbish bag system if they so choose.

Thank you for considering my perspective. I look forward to the Council's response on this matter.

We own the property at XXXXXX Kuratau. We only stay at this address occasionally through the summer months and use the rubbish and recycling centre at Kuratau when we drop off our green waste. This works for us.

So really, it won't affect us either way unless there will be extra cost involved in the rates.

Is there anything else you would like to tell us about this issue?

Hi there, My wife and I are co-owners of a batch in Pukawa.

The current rubbish bag sticker system works well for us as we are rarely there for more than a couple of days at a time. On a Sunday evening we can leave the stickered bag at the top of the lane as we leave to go home, and it gets collected the next day.

The concerns I have about the wheelie bin proposal as I understand it are:

1. Bi-weekly collection. I understand the bins are to be emptied every second week. I just can't see how that will work for us as the batch is not occupied every weekend. Do we take it to the top of the lane at the end of our week and hope someone will bring it back? If there was someone in the following weekend, would they have to retrieve a half-full bin before they could use it. And what if it's totally full? (A benefit of the sticker system is you can put out multiple bags if you need to.
2. It's not clear to me where the bins would be taken for collection. I've heard there may be centralised locations - that just makes the above problem worse.
3. There's also the issue of bins sitting around with rubbish in them for up to 2 weeks at a time. That sounds like a smell issue in the making.

I've not seen any quantified \$ savings for the council by introducing this scheme - so why do it - we like what we have.

We are an accounting business and would never fill a yellow bin in 6 months for our office. I object cause the bin would sit outside our office and other people would put there rubbish in it. Some shops have no occupancy in Turangi, so bins are going to hang around outside these businesses for other peoples rubbish of all descriptions. We get rubbish, recycling belonging to various people dropped outside our business in the parking area. This is people driving into the parking area which is dedicated for workers in these shops only.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework. ?

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

Yes I would like to see a waste system similar to how the Scandinavian countries use where they burn a lot of the waste and have it turned into power and recycled back into the community. Scrubbers used in the furnaces so as to reduce omissions.

1.11 Any other feedback?

I also would like to see the council look at a registration fee's for household cats as they fowl people's garden and are as much a pest. They tend to roam peoples garden with owners showing no respect to the damage they cause and birds they kill.

The rate increase is too much, especially for people who generate little rubbish.

If the bin idea goes ahead then each empty should only be done with a purchased tag attached to the bin...i believe this system is used in Auckland and is a better user pays model.

Time to cut the staff numbers At April 2018, of the 361 employees, 38 were Managers.
At April 2024, of the 430 employees, 57 are Managers.

60 off them are being payed ova \$100,000 a year. Payed by us the rate payers

Why are you in so much debt? Just stop doing any more infrastructure until they become debt free, simple really.

All of those ridiculous roadworks that have messed up the CBD. A compleate waste of money!

Stop expecting your rate payers to keep bailing you out.

What do you think we should do more/less of? (be specific)

We don't need wheely bins to replace bags. The cost is not worth it. Bags are fine, and do not take up space on sections becoming an eyesore. Half the homes in my neighborhood are holiday homes so these bins will be left on the roadside for a long time making them prone to vandalism.

Another bridge across the Waikato River is completely unnecessary. The congestion at the bridge in town is minor at peak hours and should be put in perspective to the financial burden this will cost rate payers.

I don't believe it is the councils responsibility to provide affordable housing.

1.4 Tūrangi Wastewater

Strongly Agree

1.5 Taupō North Wastewater

Strongly Agree

1.6 Bag it or Bin it

1.6.1 Disagree

Agree

Is there anything else you would like to tell us about this issue?

I disagree with the plan to introduce wheelie bins in settlements which are predominantly holiday homes, e.g. Pukawa and the other southern Lake Taupo settlements. Reasons are:

- For short stays it's **impractical** to leave a wheelie bin at the curb when departing. They will just sit out on the curb and end up being blown around
- **Cost:** for holiday houses which are not regularly used, wheelie bins are expensive '**overkill**'. No need for the additional cost, the present system works fine.
- **Minor environmental impact:** current system has minimal environmental impact with most holiday homes having only the occasional bag to put out.

I own a property at XXXXXX Omori. I am writing to you to make a submission.

I have owned this property since 1976.

It would not be necessary or appropriate for my family to have wheelie bins stored there. While I acknowledge it is a much better system than using rubbish bags we are not permanent residents at XXXXXXXX. For the past 49 years we have brought all our rubbish home to our permanent home, paying and now using the wheelie bin system here in Clevedon except for compost which we do on our property. We would like to continue with our present system which is the logical one for us to use and the best use of resources. We generally stay for short periods regularly at Omori

What do you think we should do more/less of? (be specific)

Council should continue to address the issues associated with the inappropriate trees in Turangi. After speaking with your staff, we understand that no further trees are planned for removal. This seems a very poor decision. Climate change is on your agenda, yet the risk associated with these trees is not. We have a massive Oak tree between 44-46 Paekiri Street. Storm conditions have us watching this tree as it peppers our house and windows with branches and debris. Some of it is not small. Several houses would be severely affected if this tree comes down in an uncontrolled manner. Council should continue to protect ratepayers from avoidable dangers in a planned way.

Do less

What do you think we should do more/less of? (be specific)

The changes to the roading structure that have been or are being implemented are impacts for the better for the residents, there are judder bars everywhere, and pot holes on Napier road, why do we need a big roundabout on Wairakei Drive.

I agree there is a housing shortage in Taupo and a gap is needed for the middle income earners who are between being supplied with a brand new house, and being able to afford a million dollar house, yet the middle income household is being hit the hardest with rate increases.

What do you think we should do more/less of? (be specific)

Regarding Kinloch: the concrete pavement along Whangamata Road is not essential - the intersection with Kinloch Road does need safety work and would be good to improve parking at the Whangamata Stream entries for safety.

The Kinloch lakefront - parking area improvements would enhance the appearance of this area and likely some safety as well.

Waste bins: seems like a good idea, but how will you address private road issues such as in the Poplars at Kinloch? Will we lose the local transfer station?

1.5 Taupō North Wastewater

nothing wrong with the system we already have. It seems to me it is needless spending in these tight times & could be looked at at a future date when economic conditions improve. The Council needs to tighten its belt as its rate payers are

Is there anything else you would like to tell us about this issue?

We understand that discussions are currently in progress to discuss implementing wheeling bins in the Omori and Kuratau area and we would like to air our concerns with this proposal. Whilst we are permanent residents, the area I believe has a higher percentage of weekend and holiday visitors, this means that refuse bags and the current plastic boxes for recycling are often left out on the days that they vacate meaning it may be up to a week before they are emptied or returned to the property. We feel that this would be problematic with the large bins, during windy periods they could potentially blow into the roads and if full the contents will scatter. We ourselves use the Omori refuse station on a monthly basis to dispose of our rubbish and recycling, we find its opening times work well and it is well maintained.

Thank you for considering our thoughts we hope it will be helpful in your future planning.

Strongly support the move to wheeille bins. I feel this also reduces the amount of plastic going to landfill with a reduced need for rubbish bags. A future education idea could be to show where and how the food scraps and recycling are processed and reused. This might give people more motivation to recycle and sort properly if they can see the process and the end results.

1.11 Any other feedback?

I have received an email today 14 June 2024 advising that there is proposed an increase to Fitness Studio Membership: 12 months for Senior/Student from \$237.50 to \$287.50.

I wish to say that this increase of 21% is excessive and at most a fair increase should be no more than 10%.

With your council annual residential rate increase being less than 2%, I consider the proposal is far too high for the Fitness Studio Membership.

Council should be encouraging Seniors and Students to keep up their fitness. It is inevitable that many will no longer be able to afford this large increase in fees.

I recommend at most a 10% increase.

Suggested changes to swim school fees is pretty steep! We have three children - if they all did swimming lessons this would be on average \$450 a term, or \$1350 for the year! For a town on the lake where learning to swim can be life saving and with only one option for lessons, I would be great to keep the cost of lessons as reasonable as possible.

Is there anything else you would like to tell us about this issue?

we need to get rid of the plastic rubbish bags and replace them with paper rubbish bags or a waste bin.

we do not need to waste money on a food scraps bin .

stop wasting time on stupid labour policies

1.7 Housing
Disagree

1.7.1 Disagree
Disagree

Is there anything else you would like to tell us about this issue?

the plan does not include some tiny homes in the plan.

we need to have areas and corners etc. That allow a 50 m² or smaller house preferably somewhere around 25 m² .

we do not need massive houses any more but a bit land and a tiny home .

the homes need to be affordable .

do not need to put the land on the open market for speculators to make money on this land needs to be solved with conditions that the first home owner would be keeping it for a minimum of 5 to 10 years and before this it would be offered back to the council first .

The bins are unsightly and clog the streets. In Auckland they cause a hazard for people moving in and out of their driveways especially in more intensive housing areas. They clog the footpath and unloading them into trucks is noisy. Recycling is much more haphazard than the kerbside checking that goes on now. The recycling bins in Auckland contain all sorts of items that would be rejected in Taupo. Bottles with tops, dirty containers. There will be more expense from sorting, checking and then diverting to waste.

Agree

1.6.4 Agree

Yes, with rubbish bins smaller than recycling bins we might get the idea and recycle better. Food scraps not needed maybe, we all have gardens and can compost if there is more knowledge out there.

Wheellie bin sizes (and prices!) people can opt for a size regarding waste. Done this way back in the Netherlands. That way financial imstentive to even waste less

1.7 Housing

Please explain why you support or do not support the proposed eligibility and assessment framework.

Pool fees increase. No! !! It's a life skill, we live with Taupo moana. It shouldn't be a financial reason to learn how to swim or not. No, people with more money (ak bigger houses and higher rates) should pay towards this more. Look out for each other here

1.11 Any other feedback?

Pool fees up, absolutely not! Life skill, community should pay for all to have this opportunity.

1.6 Bag it or Bin it
Agree

1.6.4 Agree

The rubbish bags are an outdated concept and need to be replaced. I favour a bin over the current bags system as we should be moving away from single use plastic.

I don't understand why the recycling bin need to be so large though, could they not be the same size as the waste given they will be collected fortnightly? It seems a significant jump to go to a 240l bin from essentially two crates. It is not clear whether all the waste would go into the single recycling bin, glass in with everything else? This is strange given we've just been asked to separate it all out.

Elsewhere in the country I have friends with large recycling bins and they have issues with the wind blowing them open and have had to get rubber straps to hold them closed. The straps dislodge when the bin is tipped into the truck. Might need to factor this additional cost in for Taupo also.

It would be good if there were options based on the size of the household and their needs. Having two large bins is quite a bit to store at each residential property.

I would personally not use a food waste bin as I have a green waste bin that I pay for separately where vegetable waste can go.

I would prefer to see a greenwaste bin option so that garden waste can be taken care of. It is not clear to me from the proposal whether the waste bin will also take garden waste? I would prefer this to be recycled like I do currently through a private operator. I would like Council to consider a green waste option, even if it was an optional extra added to the rates.

When I worked in Ireland over 10 years ago, they had a pay by weight system for rubbish and recycling. The trucks weighed the bins and people were charge accordingly. This was a great incentive to reduce waste and increase recycling as the costs were different, recycling might even have been free. While I appreciate this would require additional technology, it would likely incentivise good recycling behaviour and might be something to consider for the future.

The public steps at Whareroa in Hinekapi Terrace need safety improvements. They are currently dangerous especially for children and the elderly. Similarly the lake shore line has suffered significant erosion and needs a solution.

Finally, service requests for things such as water leaks need to be addressed much sooner to reduce damage and waste of a key resource.

Totally against the move to bins. And so many bins at that! Personally I would have trouble finding room for them all. As an elderly person who is (I think) reasonably organized I can go for 3/4 weeks before I have to put a rubbish bag out for collection. Yes, I make use of the recycling bin and the glass bin probably every second week. So I, personally, feel I will be financially disadvantaged by your bin proposal. Food scraps go in the compost bin. OK, I would agree with your intention of each household having a food scraps bin. Obviously all householders are not gardeners. Happily, where I live we do not have the problem you emphasize about dogs tearing bags etc. And you can bet the smart looking bins that people will be issued with will very soon become smelly dirty containers which are soooo hard to clean - even if the householder was prepared to try. NO to your bin proposal. Cheers!

The current system works well in Omori and Kuratau. Currently, we have to take our rubbish 300m down a very steep hill to a collection point on Te Puke Road because contractors will not come up our sealed right-of-way (to us and five other houses). That works fine for us, but would not be possible with wheelie bins, so we would support continuation of the current service and/or the dropping of rubbish bags and recycling at the Kuratau Transfer Station.

For us, returning wheelie bins 300m up a steep hill is just not viable. The other issue for us is the cost to the council of purchasing the bins, interest cost and annual cost of the service to replace a system that works well. Ideally, if the proposed option does go ahead, we would like to see the ability to opt-out and maintain the status quo (and even if kerbside collection isn't possible, to continue to use the Transfer Station).

1.6 Bag it or Bin it

Disagree Strongly Disagree Disagree Strongly Disagree

1.6.1 Disagree

Agree

Is there anything else you would like to tell us about this issue?

My preference is for the alternative option for the reasons set out below. This is based on my experience with both options, arising from visits to my daughter and her family in Auckland where there is now a similar system to the proposed one.

1.) Currently in Taupo the plastic rubbish sacks are visible in streets on collection day, but are soon removed. If the small recycle and glass bins are left they are not too troublesome or unsightly. This befits Taupo as a tourist destination labelled as among the country's most beautiful towns. By contrast, in Auckland the large wheele bins are often left scattered around streets, often for days, creating a sad 'down at heel' impression.

2.) On collection day where there are blocks of flats, or several dwellings sharing a driveway, large bins jostle for position on the berms. When they are emptied and are therefore relatively light, they are left scattered, and often encroach on the pavement making it difficult for wheelchair users, parents with prams, and others. I have frequently seen bins off curbs and in the gutters, or across driveways.

3.) I like the 'user pays' aspect of the current system. Sole occupants, often pensioners, do not always put out a bag each week. I find a single large sack in a plastic version of the old-fashioned 'Oscar the Grouch' rubbish bin with lid is a good safe container for a sack until it is full enough to put out, and this does not attract animals.

4.) Most importantly, under either option I strongly oppose the universal distribution of the food scrap bins. Based on the Auckland experience very many residents won't use them. Those who do will not want them inside. However when outside or at the curb, they are of interest to opossums, cats and dogs. They are small, and if only partly full, are easily tipped over. In fact after collection they are light enough to blow away. Residents such as myself who compost do not need them. This is a huge waste of ratepayer money. I would support the council purchasing a smaller quantity of them to be available on request.

You might argue that distributing food collection bins only to those who opt for them would make the collection day pickup too small to be worthwhile. However, that is a poor argument because, even if you distribute widely, the pickup will soon involve only a few bins. My daughter in Auckland reports that these bins are strongly disliked and considered a nuisance by many residents.

Right now many are struggling to pay for the basics. How can council even conceive a plan (bags to bins, food waste collection ect) that will cost more? Only when the economic environment improves will it be appropriate to consider changes to rubbish collection etc. Even the food waste separation and collection is a luxury right now. Compensate with a consistent message to reduce food waste and encourage self sufficiency i.e. grow your own fruit and vegetables and make waste into composte to fertilise the garden.

Note: it would be interesting to see a calculation for how much truck fuel etc is utilised to collect the food waste versus how much methane reduction is achieved through separation and collection.

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Agree

1.5.4 Agree

How did council get into a situation where waste water disposal has now become an issue. A longterm solution needs to be developed urgently and funded from continuing developments on the northern side of Taupo. Is the current treatment / pumping station on the banks of the Waikato River a major environmental spill risk??

Maybe the disposal scheme for the Northern side should consider a treatment plant and disposal in forest land further out on Pohipi Road- beyond the Lake Taupo catchment zone.

1.6 Bag it or Bin it
Disagree

1.6.1 Disagree
Agree

Is there anything else you would like to tell us about this issue?

Please see my earlier comments - we cant afford any upgrades or changes right now. Maybe reconsider in 1 or 2 years time. As I live in the rural area I am not directly affected. I hope I will never be required to use a large wheelie bin for the small amount of rubbish we generate.

1.7 Housing
Agree

1.9 Community Funding

Waste water tanks? That can't be a serious option, surely!!! How many of these things would you have to have and at what capacity? What happens if one or more fail? What are they to be made of and what's their expected lifespan?

A better option would be a more effective waste water treatment plant. Put it out to suppliers commercially and see what comes in.

1.6 Bag it or Bin it
Strongly Agree

1.6.3 Strongly Agree

With bins, there is an increased risk of people just tossing all sorts into them. There's a big risk of contamination of recyclables, and where will it be sorted?

Where is the food waste going?

1.7 Housing

Agree

1.7.3 Agree

HEAPS!!! Both options come well below my personal expectations of a caring, community minded (and funded) council.

1.8 Development Contributions

Yes

Is there anything else you would like to tell us about this strategy?

1.9 Community Funding

Yes

Please explain why you agree or disagree with these changes.

Sounds like it needs to be more streamlined. Although changing all this will be an expensive exercise, I hope, in the longer term, it will benefit community groups.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

I'd love to know HOW this plan will come to fruition. It's all very well to say the plan is to achieve xyz, but how will that be achieved?

1. In Hamilton, I have seen the difficulty that many people living with steep/long driveways have had with the Wheelie bins, being, that a full wheelie bin going down a steep drive is almost impossible to control. Current plastic bags are usually taken down in the boot of a car, and nothing to bring back up the drive.

2. Rethink the food waste bins...these food waste bins become very smelly and attract an enormous number of flies. THEN the bins I witnessed are washed out and the remaining waste that has been stuck to the bin sides are dumped down the outside drain. Crazy stuff.

3. Definitely not ideal to have the big bins for general waste because of the issues for those who are not strong enough to manage them. Stick with bags.

3.

1.6 Bag it or Bin it
Strongly Agree

1.6.3 Strongly Agree

Wheelle bins is a restrictive option, it offers no flexibility and is again wasting money. Think about less able bodied people and how the hell are they going to manage manoeuvring a bin down a steep drive???? It doesn't stop at the bins, new vehicles for picking up the bins would be required. Yet more money wasted. Even if you adapted the current vehicles, this would cost more again. Look at the current bags and bins ... some weeks we only

have half a bag of landfill waste other times we have more, with the wheelie bins it trying to get a 'one size fits all' solution. Moving on to another thought, Holiday homes/batches, and yes we have a lot of them here, nature of the beast so to speak. Who is going to take the bins out (Air BnB for example) or even take them back in????? To top it all, I don't want the damn things cluttering up my property thanks. So slick your wheelie bins in room 101.

KISS _ Keep it simple stupid

1.11 Any other feedback?

The lack of clear and concise communication from the council is worrying. Having attended the Turangi meeting it was clear to me this had been a haphazard assembly of the required information. The devil is in the detail ... something as simple as the wheelie bin cost increase was just a dollar figure with no reference to timescale. eg. per annum, monthly or weekly. I have a request for the cost of the cycle track in Taupo. Also when questioned about the community centre for Turangi, the reply was the costs had risen, well if you had actually got off your collective behinds and got it done, then we would be in a better position than we are now. Vacillation and feet dragging seem to be the modus operandi for this council, except when it for Taupo.

My husband and I are members of the Masters' Exercise Class at AC Baths on Tuesday and Thursday mornings. We are very concerned at the proposed increase in annual fees for Seniors which represents a 21% increase - a 10% increase would be more realistic. Surely you do not wish to discourage Seniors from taking regular exercise which is necessary for their health by making costs unreasonable.

The council must be more open with major proposed projects and actual costings i.e. the major work that was done on the corner of Tongariro Street and Lake Terrace was a poorly advertised for ratepayer consultation and we were advised that the Government would fund the entire project but it ended up costing the ratepayers about \$10,000,000.00. If we had been given the full facts I am sure the ratepayers would have strongly objected to proceeding with this project. I have spoken to many ratepayers and I am yet to find any who agree with the project and its costing.

I support this **unless it is race based**. There is no room for racism in Taupo.

1.10 Waste management and Minimisation Plan
Yes

Is there anything else you would like to tell us about this plan?

The council should consider an annual collection of larger items (like matrasses, chairs, garden furniture etc) so that people will not need to dump these items.

1.11 Any other feedback?

I feel that **ALL Taupo ratepayers** should be treated equally. The council charges the rate payers large fees for services, and should be very conscious of how it spends our money. Stöck to the basic functions of a council and leave the political aspect to the government.

While I agree that switching to wheelie bins may reduce rubbish blowing around the streets I feel that those of us who are very aware of the waste we create will be penalised by paying a hike in rates for a service we will not use every week.

We currently put out one bin bag every 2 to 3 weeks (even then it's not always full), we recycle and we have a compost heap and worm farm. Our food waste is so minimal I don't think we would be filling the food waste bin more than once every 2 to 3 months let alone weekly but we will be charged on the rates for the collection whether we put the bin out or not.

Considering we are being encouraged to waste less food (I recently attended the evening with Kate) I think being given a food bin will be a retro step and I'm sure I represent a number of people with the same view.

I'm certainly not in a financial position to waste food or pay extra for a service that I simply will not be having the full use of. Maybe the food bins could be charged 'per use' as per the sticker system. In fact maybe the wheelies also (maybe barcoded so each time it's emptied it's charged to the homeowner)

Whoever wrote up this proposal for wheelie bins was very biased towards them i feel.

The 2023 survey you ran i feel was a load of rubbish, how can you get a fair representation with only

1272 responses from a district of 40,000 odd people.

Another reason for not having wheelie bins apart from costs is the fact they are bulky to move around

especially for us older people. I also have a steep drive way to get up and down on, and its much easier with a rubbish bag than a wheelie bin

The cost of implementing wheelie bins is in the millions of dollars. We already have a collection service

that may not be perfect however neither is wheelie bins.

Is there anything else you would like to tell us about this issue?

I only put out 1 rubbish bag every fortnight so being forced to pay for a large bin is a waste of my money. This should be an optional charge for households who wish to have a wheelie bin..as for food scraps I use a compost at my house and we don't waste food so another facility my house won't use.

1.7 Housing
Strongly Disagree

1.7.2 Strongly Disagree

Disagree

Is there anything else you would like to tell us about this issue?

first home buyers can not afford half a million dollar homes!!!! This is not helpful to the ones who need it most..selling the land in sections with no restrictions to build would be more ideal so first home buyers can buy a piece of land and do what they like with it eg.tiny home, caravan, or just keep it bare..not everyone wants a flash house, they just want somewhere to start. Let's face it buying a house new or old in today's market is not an option for the typical FIRST home buyer in Taupo. Even if the land was kept owned by the council and sections rented out with the restrictions being set as home must be on wheels, creating a tiny village and place for low income families to live. Alot of options but new builds is not a fair option for the poor.

What do you think we should do more/less of? (be specific)

The proposed introduction of bins is of no use to the majority of holiday houses in the Western Bays (Kuratau, Pukawa, Omoel etc.) and would be a waste of money for these areas and should be excluded. Most holiday houses aren't used on a weekly basis and owners would not be there to put bins out and retrieve on a weekly basis. So the streets could be littered with bins that stay out on the road side for weeks or months in a row.

The current bag system and transfer station is still the best option. The bin system would be a massive waste of ratepayer money and wouldn't be regularly utilised.

We disagree with the proposed plan to introduce wheelie bins for all residents in rural areas. We are comfortable with the present system and have been paying for this in our rates for the past 16 years.

Wheelie bins won't work for the ratepayers at 1136 State Highway 41 for the following reasons:

- Long steep gravel driveway which will make it difficult to transport a wheelie bin to the roadside and back regardless of whether or not it is full or empty
- The age of residents down this driveway is of retirement age making it more difficult for them to handle wheelie bins
- Plastic used for wheelie bins absorb smells which we then have to have around our home -these will encourage rats and mice
- We don't create enough waste to warrant a wheelie bin – and storing it for two weeks or more would encourage more smell - [refer to previous point]
- We are a lifestyle community and therefore do not have food scraps-these are either composted or fed to

hens

- Wheelie bin proposal will incur an additional fee on top of our rates

Yes

Is there anything else you would like to tell us about this plan?

1.11 Any other feedback?

keep Taupo affordable for its own people.

growth for growth sake is destructive

concentrate on quality of life in taupo rather growth

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Local Community
Taupō

1.2 Next 10 Years
Agree with the plan

What do you think we should do more/less of? (be specific)

1.5 Taupō North Wastewater
Agree

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

As a retired couple the Proposed Option would cost us considerably more than the current system as once our recycling is removed we have very little rubbish for pick up, generally only half a sticker per fortnight. We compost our food waste. We also have a flat which is seldom rented out so we would be paying double for a service not used.

1.7 Housing
Agree

1.8 Development Contributions
Yes

Is there anything else you would like to tell us about this strategy?

1.10 Waste management and Minimisation Plan
Yes

1.2 Next 10 Years

Do less

What do you think we should do more/less of? (be specific)

very unhappy about the proposed rubbish bins/foodwaste etc as for those of us who sort our own recycling and do worms for composting it is a massive expense that we will see absolutely no benefit from. So for people like my lovely clients who are elderly or disabled very rarely even use 1 rubbish bag of rubbish every few weeks bins are going to be far too difficult for them to use.

1.4 Tūrangi Wastewater

Strongly Agree

1.4.3 Strongly Agree

keeping unnecessary costs down at such a difficult time it to be commended.

1.5 Taupō North Wastewater

Strongly Agree

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

this proposed preferred option is both very costly and unnecessary to most people. Not to mention unwieldy and difficult for disabled or elderly people. I think this preferred change is a big waste of time money and effort at such a trying time for people. I know of many people who are struggling to keep their heads above water dispute cutting out all unnecessary expenses and this increase on their rates is unfeasible and could lead to ruin for many people

1.7 Housing

Agree

1.7.3 Agree

as far as I've seen this is already underway and isn't going to cost rate payers overmuch so may as well do it

1.8 Development Contributions

Yes

Is there anything else you would like to tell us about this strategy?

1.9 Community Funding

Yes

Please explain why you agree or disagree with these changes.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

I agree with this plan with the exception of the already covered new rubbish and recycling bin change

I agree bins in permanent communities work very well, I don't agree that they will in Kuratau / Omori because it's populated by holiday homes.

The majority of houses are occupied for just for a few days at a time, mostly weekends, so if we put the bins out for a Monday pick up the majority of residents will have returned home with no one to take the bins in.

The irresponsible ones will leave them out for long periods littering the streets and the responsible ones will not put them out at all. We'll do what we've always done, take the bag to the refuse centre so in effect we'll be paying twice.

Feedback

1.11 Any other feedback?

I am making a submission as an individual, regarding a section of the above 10 year plan. Whilst I am broadly in favour of what the Council is doing, there is one particular matter I believe should be brought to the Council's attention. It is only a small matter in the grand scheme but it affects a number of ratepayers.

I have been attending the Aqua Fitness classes at the AC Baths for about 6 years now and thoroughly enjoy it, I believe it plays a valuable part in the wellbeing both physically and mentally of those who attend.

Pre-Covid, the classes operated Monday to Friday, post-Covid that was brought down to 3 per week, Monday, Wednesday and Friday. The fees remained the same. Fees were increased sometime in 2022 and again in 2023, a 10% increase then. Then this year, in April, the number of classes were reduced again, the rationale being that they were being brought in line with all other classes at the Events Centre, we now no longer have classes in the school holiday periods.

The end result is that fees have gone up, classes have been reduced significantly, and now you are proposing that fees go up again, this time 23%. This seems to affect a small number of people a much greater than average amount. I would ask that you make this section of the fees a special case and make no increase this year.

Generally I applaud what the Council is doing and how they manage the town.
