Would you like to present your submission in person at a hearing?

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Local Community
Tūrangi

1.2 Next 10 Years
Agree with the plan

What do you think we should do more/less of? (be specific)

wheelie bins are a great option and solution. Having lived in Porirua where it is standard the positives of this service are excellent.

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Strongly Agree

1.6 Bag it or Bin it
Strongly Agree

1.6.3 Strongly Agree
great solution a tried and tested in other towns across nz.

1.7 Housing
Agree

1.8 Development Contributions
Yes

Is there anything else you would like to tell us about this strategy?

1.9 Community Funding
Yes

Please explain why you agree or disagree with these changes.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

Whilst one of the positives mentioned is that staying with pay as you go bags does not encourage waste reduction, i believe the opposite is true. People will feel the need or the Right to fill the provided wheelie bin. There will be no motivation to try and reduce waste as they are not paying as they go.

Feedback

1.1 Local Community
Taupō

1.2 Next 10 Years
Do less

What do you think we should do more/less of? (be specific)

Firstly, have a look at your organisation and how many people are employed compared to 6 years ago.

Plan to reduce staff numbers by up to 20% and spend 20% less in areas like community leadership, community facilities, District development and planning and regulatory areas.

The proposed levels of spending are unsustainable for rate payers .

This should apply for the next fifty years. not just the first years of this plan.

1.4 Tūrangi Wastewater
Agree

1.4.4 Agree

Put a deadline on the issue and a fixed budget attached to the problem. There should not be unlimited funding available for endless consultation.

1.5 Taupō North Wastewater

Agree

1.5.4 Agree

Council needs to put a fixed budget on consultation .

1.6 Bag it or Bin it

Agree

1.6.4 Agree

Other councils put recycling and glass together to reduce the number of bins/crates.

Keep the rubbish recycling bin as small as possible to encourage people to create less.

1.7 Housing

Disagree

1.7.1 Disagree

Disagree

Is there anything else you would like to tell us about this issue?

I dont think council should be building houses.

Put the funds towards the most essential services like water

1.8 Development Contributions

Yes

Is there anything else you would like to tell us about this strategy?

On the condition that ALL development is treated and charged equally

1.9 Community Funding

Yes

Please explain why you agree or disagree with these changes.

Generally, all funding should decline and not be expected to continue

1.9.1 Community Q2

No

Please explain why you support or do not support the proposed eligibility and assessment framework.

All funding needs to decline

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan? This should be treated as a vital service

1.11 Any other feedback?

The costs of council have to decline over time

1.4 Tūrangi Wastewater
Agree

1.4.4 Agree

yes. I didnt want to tick anything because i am unfamiliar with the town n thus feel unqualified to comment

1.6 Bag it or Bin it
Disagree

1.6.1 Disagree
Disagree

Is there anything else you would like to tell us about this issue?

i have disagreed with both. However i do support change but only when a new system can be implemented to a seamlessly high standard from pick up to the final stage. Dont waste my money on half pie ventures. Do it once and get it right.

i have adapted my habits....i pay for a monthly Enviro green only, waste pick up, as well as having a compost bin built in the garden. I manage this carefully and comply with the requirements for these 2 systems. I put out a yellow bag every 2 to 3 weeks. I use the 2 recycling bins when necessary and Im mindful of how full they are and what the weather is doing and whether I'm compliant with your current requirements. My property slopes, i do not want to live amongst multiple rubbish bins which will be upended when it floods and i especially do not intend to live with a food waste bin either outdoors on the slope nor in the garage. I already manage the food waste.

you are forcing me to pay for something which i do not believe is a sustainable clean green well thought out plan at the end point. I hope that you have consulted extensively with and actually listened to, the employees at the coal face..i.e. the landfill end point. All the best with your efforts..

this works for how i manage my property and myself.
i do not want f

1.7 Housing Agree

1.7.3 Agree

yes, I support the need. I want to see this housing also being built slap bang in the middle of suburbs, and squeezed right in alongside properties belonging to both Council staff and in particular, Councillors. Then i will feel confident that Council does indeed understand and is fully cogniscent with equity and a clear, open and honest intent.

1.11 Any other feedback?

i am unsure why it is considered acceptable for Council to not reply to a Service Request, to not engage and to simply continue to close a file without communication.

i want reassurance that whilst Councillors and council quite rightly pursue development for the future, Developers are held to a high standard, with no exception, just as you demand of your Ratepayers. i also want reassurance that as you plough ahead, Council and Councillors remain actively aware that there are vulnerable hotspots in some areas in Taupo which are putting people's properties at risk. I would like to know and feel confident that such spots remain current and active in this current long term budget. Its good to look forward however perhaps you shouldn't dismiss others whilst you do. we pay Rates too.

i would like to think that the Taupo District Council has heard the recommendations of Peter Bouchier and Open For Business and is moving toward adopting recommendations. To date, i have greatly appreciated the willingness of individuals on Council to listen with courtesy and with an open mind and helpful discussion. Its progressive.

with respect for the hard work you do, thank you.

As our home is a holiday home in Pukawa wheely bins are not practical. We cant leave them out when we leave. A big bin cant be stored and is far too big for our use. I feel you need a different system for hoiiday settlements as bins are not fesible. We have one in our country residence so know their advantages.

1.10 Waste management and Minimisation Plan

No

Is there anything else you would like to tell us about this plan?

user pays, strongly encourage people to minimise food waste, and where appropriate for households to have and operate a simple composting system. Instead of these food bins, that have no place in my life, please offer people the option of a compost bin. Ideally 2 bins, so one can ne filled whilst the other is composting, ready to be emptied and spread before it needs to be refilled. I agree 2 weekly rubbish is fine regardless

1.11 Any other feedback?

Im at Oruatua, we have Envirowaste collection, and im very happy for this service to continue, as i don't think we're part of any proposed change

Living on a rear section with a very steep driveway would prove impossible to use big wheelie bins. My neighbour is 60 and her mother 89. They would not manage it at all. We drive our rubbish down to the curbside and this works for us. The current bins fit easily in the boot of our vehicles to drive them down the steep driveway

I rarely put a rubbish bag out on a weekly basis. The norm is once a month. I don't accumulate much rubbish at all. My recycling bins are put out usually every 3rd week. I don't require a food scrap bin.

It will be a huge extra cost on my rates for something I don't require.

People shouldn't be forced to give up the user pays rubbish collection for wheelie bins when they don't need them. There will be many households out there in the same boat as well as pensioners living alone who can't afford the extra cost of something they don't need.

I don't have any space inside to store the bins & don't want them sitting outside in my tiny yard in sight.

As a mum of a disabled child we go through heaps of waste that cant be recycled, for instance at the moment we hire a wheelie bin for my sons nappies and fill one of these up a week, we also purchase a yellow bag for our other waste. I am worried that one bin wont be enough do our household. I support the proposed change to bin it, however serious consideration on how to accommodate families like mine need to be considered, we do not want to be doing a weekly landfill run with our waste not only the cost getting to the landfil from Wharewaka but how much the minimum charge to dump also. Talking to my sons incontinence nurse there are 500 people in Taupo alone that are incontinent and in nappies some adults wont be able to even drive anywhere to dispose of, they will be in the same predicament as us, you cant recycle nappies ie human waste and they need to be disposed of hygienically

Is there anything else you would like to tell us about this issue?

It seems obvious there is a large proportion of Taupo sections that do not lend themselves to storing wheelie bins out of the way & preferably also out of sight. Many driveways would present a serious challenge to any wheelie bin pusher/puller, whether young or old, and then there's the wet or frosty weather to factor in.

Present bins are easily sorted. We do need biodegradable bags, quit the plastic. Find an alternative, there has to be one.

Lack of any capital requirement is a no-brainer for retaining a version of the current system.

The suggested service to replace bins where required would undoubtedly be expensive, open to abuse, and

hard to monitor for satisfactory performance.

What do you think we should do more/less of? (be specific)

See written submission attached

It appears that TDC calculates rates by listing the anticipated operating costs plus all that it would be nice for the town to have, costing this, maybe trimming a few things off, then determining the individual property rates necessary to fund the revised list. However, this is NOT how the vast majority of people and businesses operate. We take our income and spend it first on necessities (food, health, insurance s, essential household operating expenses, etc) then, and only then, do we spend what is le over on what it would be nice to have. TDC must adopt this philosophy. We cannot go on having our rates increase by several times the Consumer Price Index (CPI) each year. We, a retired couple on essentially a fixed income, already have TDC rates of over \$ 9000 per year (2024-25). Our rates are our largest single expenditure – exceeding food and power combined. TDC must realise they are the only significant Monopoly in the Economy; the “last gravy train”. We can shop around for food, electricity, petrol, insurance, household goods and services. Furthermore, in opposition to our country’s general “user pays” economic philosophy, our rates are not based on what we use, but on the “paper value” of our property. Unfair, but we see no rush by councils to ask Government to change things.

RATES MUST NOT SIGNIFICANTLY EXCEED CPI. The town must learn to live within what the residents can afford. The days of Covid-related largesse from Government are over and Council must get over its spending binge mentality.

As the LTP says “The reality is we simply can’t afford to do everything ”. Correct. We never have, both as individuals and as a community – and never will!. Non-essential things should be deferred un l the current high inflation has subsided.

TDC MUST FOCUS MOST OF ITS EFFORT AND MONEY ON THE ESSENTIALS

The proposed rates increases of 12-15% for 2024-25 are unacceptable. It should be 8% maximum. We find the Table showing rates increases trending down to 1.3% in 2034 is laughable. When was the last

me, apart from the Covid years, that the annual rate increase was less than 2% ?. If it happens there will be “pork in the treetops”, and I will eat my hat. And if it doesn’t happen will David Trewavas and all the present Councillors eat theirs ?.

We would like to see “new” spending being linked to the overall state of the Economy. The LTP says “At our current levels of service, we are looking at around a 8 percent rates increase to cover the unavoidable rising costs of interest , depreciation, electricity and insurance ”. 8% should therefore be the amount of increase; even this is about twice the CPI. **WE STRONGLY OPPOSE THE COUNCIL PROPOSAL TO INCREASE ITS RATES INCREASES AFFORDABILITY BENCHMARK FROM LOCAL GOVERNMENT COST INDEX**

(LGCI) + 2.5 PERCENT TO LGCI +5 PERCENT.

Doubtless you will say “if you cannot afford the rates we set then sell and move to somewhere cheaper ”. Be careful what you wish for. If we sell our absolute lakefront property, it will undoubtedly be to a wealthy Auckland or Wellington family who will come at holiday periods only and, like most of the houses around us, leave it vacant the rest of the year. I doubt if they will spend the amount of money in the town we do over the year; it will be spending at holiday homes only, leading to strongly fluctuating business income. Does the business community want to be closely linked only to the volatile tourist industry, like Queenstown. Furthermore, why should we (residents for over 40 years) be forced out.

Financial Strategy

We APPROVE OF CONTINUING TO FUND 100 PERCENT OF DEPRECIATION OF COUNCIL ASSETS over the

assets’ life cycle. However, depreciation MUST be “ring fenced”. One of us, who before retirement was in mid-level management at a Government department, has experience seeing depreciation funds “stolen” to pay for “nice to have” or “pet” projects. There needs to be strict, uncircumventable, rules to stop this: in your example the depreciation on the mower must not be used to install flash rubbish bins , architecturally unique toilets, or sculptures in the park

1.4 Tūrangi Wastewater

We approve of a new wastewater plant in Taupō North, and for increasing the capacity of our wastewater connections in Taupō town across the Waikato River, funded by borrowing. Has Council considered or talked to Contact Energy about reinjecting treated waste water from such a plant into reinjection aquifers currently used by Contact, north west of the Waikato River ?

Options for dealing with wastewater in Taupō North

We approve of a new wastewater plant in Taupō North, and for increasing the capacity of our wastewater connections in Taupō town across the Waikato River, funded by borrowing. Has Council considered or talked to Contact Energy about reinjecting treated waste water from such a plant into reinjection aquifers currently used by Contact, north west of the Waikato River ?

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

We are comfortable with the existing system. We have very little rubbish needing to be collected: most of our

waste goes into our compost bins. This is similar to other elderly folk, as expressed in the letter to the Editor of Taupo Times (final issue). Other, non-recyclable solid waste (cabbage tree leaves, broken crockery, old paints etc) we take to the Landfill (and pay). It is true that the current system is not perfect - animals rip the bags open, sharp objects sticking out can injure our collectors, and on windy days recycling items get blown out of the crates. However, although it may seem advantageous to have waste put in large wheelie bins collected by a mechanized system, we suspect there will be unintended consequences such as bins littering the berms outside holiday homes and becoming targets for vandalism. Furthermore, the collector is unable to see what unacceptable material is in the bin before it is emptied into the truck – likely leading to the whole truck load being rejected for recycling because it is “contaminated”. Our “rubbish boys” currently do a great job in sorting out unacceptable stuff at the kerbside. We do not have the space inside our garage for large bins, we would find rolling large bins challenging, and cleaning them out much more difficult than the present crates. WE VOTE TO KEEP THE EXISTING SYSTEM + FOOD SCRAP BIN

We would be happy though with a fortnightly collection. Perhaps weekly in Summer and Holiday periods. Holiday home owners and temporary visitors (AirBnB, Rent-a-bach etc) can find out when rubbish is going to be collected by looking on the TDC website – every visitor renting a house has a smart phone these days. Note that we were not impressed by the result of the Consumer rubbish tracking test (using a GPS), exposed on national TV, that showed an aluminium can going to waste rather than to recycling. We hope somebody was sent to the naughty corner.

1.7 Housing

Agree

1.7.3 Agree

See attached written submission

YES, TDC SHOULD USE LAND IT OWNS TO HELP EASE THE DISTRICT 'S HOUSING CRISIS.

This is a continuing problem. We do not want Taupo to end up like Queenstown with an extreme shortage of rental housing. Actually, there is no shortage of houses - there is a shortage of available housing. In Rainbow Point, where we live, only about 10-15% of the houses are permanently occupied. We estimate that in the Rainbow Point to Secombe Park area there are likely 500 to 1000 houses lying vacant for most of the year. We do not have an answer for this, but there must be a solution, even if it involves TDC building and operating rental property in conjunction with a private developer, or a scheme such as outlined below.

We suggest that TDC NOT SELL ITS LAND but instead LEASE it, initially to a building Developer/Company then to the persons who buy a new house from this Developer/Company. Over 50 years ago this was how we (in our mid-twenties) got our first house, in Wellington. Covenants could be placed on the arrangement to ensure that low-middle income, owner-occupiers, get the houses; if they leave they have to sell and the covenant remains. It could also be that long-term (say 8-10 years) owners could then freehold the land at market value; Council then getting the advantage of rising property values.

1.8 Development Contributions

No

Is there anything else you would like to tell us about this strategy?

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

See attached written submission

WE APPROVE OF THE CHANGES PROPOSED IN THE WASTE MANAGEMENT PLAN, especially diversion of building waste. In our daily walks around Kokomea we see much useful building material put in a single bin along with real waste. Our grandparents used to say: “Wilful waste brings woeful want”. We cannot dump our way to prosperity.

1.11 Any other feedback?

Another Waikato River crossing

A nice to have. However, if you read Danyl McLauchlan's piece in the latest “Listener” (July 6-12 2024) you will see that very very few engineering projects in this country come in on or under budget. Unless

planning, permissions, and completing the work is done within a year, I predict that the cost will be well north of \$100 million. The longer it takes the more the cost. You will no doubt say that this me frame would be impossible – Allied troops went from Normandy to Berlin in less me, against opposition.

NZTA funding changes

WE ADVOCATE REMOVING OR RE- PRIORITISING SOME TRANSPORT PROJECTS, OR CHANGING THE SCOPE OF THE PROJECTS TO MEET A SMALLER AVAILABLE BUDGET.

Water meters?

We approve of Council continuing to install water meters at new properties and for high water users and commercial users, and for the policy of using them to track water leaks. Although for the next few years, there is no intention to charge for water use for normal residential properties, it is not just the volume of water taken, per se, because it comes from an almost inexhaustible lake supply, but the fact that it is treated and this we presume is a significant cost per litre. We suggest that TDC follow some other councils in encouraging private residential owners to install water tanks to capture rainwater from the roof for use in the garden . TDC could make a bulk order, negotiate a discount, and onsell to locals wishing to put in a tank; Wellington or Porirua council have done this , which enabled us to get one via our daughter who lives in Tawa.

Treasury Management Policy

We DO NOT approve of the proposal to change to Net External Debt/Total Revenue Borrowing Limit from 225% to 250%. Council already has a high debt burden. Council only recently revised its debt to revenue limit from 200% to 225% of opera ng revenue . In 2016 Taupo District Council was eighth in the top 10 borrowers, and the highest of all the towns. We have not be en able to see where TDC sits now, but un l that is revealed WE OPPOSE ANY INCREASE IN THIS DEBT CEILING. We detect an unwise "borrow and spend, borrow and spend " attitude. Borrowing in times of high inflation and interest rates is madness.

OTHER MATTERS

Management of cats

To support the great community planning and pest trapping imitative led by Greening Taupo, we ask that TDC tackle the problem of cats (companion, stray, and feral). New Zealand is awash with cats. It is well established that cats are highly efficient predators, known to prey on native birds, lizards, and insects. We ask that controls around cats are included in the Animal Management Bylaw , and propose: a limit of three cats per household, microchipping, keeping cats inside at night, and compulsory de-sexing. There should definitely be regulations preventing the establishment and maintenance of feral and stray cat colonies, and ac on is taken against such colonies.

THIS IS A CAN THAT DOES NOT NEED KICKING DOWN THE ROAD.

Bulk purchase of electricity

We understand that large business corporations obtain, by negotiation, significant discounts on their cost of electricity. Why does TDC not negotiate a discounted rate for its residents and small businesses ?. This would likely mean resurrecting TEL. And why not – it would be advantageous to most of the ratepayers. It seems that Council is willing to get involved in far more risky business ventures (motor racing circuit) that advantages just a few business sectors.

Does the business community want to be closely linked only to the volatile tourist industry, like Queenstown. Furthermore, why should we (residents for over 40 years) be forced out.

Financial Strategy

We **APPROVE OF CONTINUING TO FUND 100 PERCENT OF DEPRECIATION OF COUNCIL ASSETS** over the assets’ life cycle. However, **depreciation MUST be “ring fenced”**. One of us, who before retirement was in mid-level management at a Government department, has experience seeing depreciation funds “stolen” to pay for “nice to have” or “pet” projects. There needs to be strict, uncircumventable, rules to stop this: in your example the depreciation on the mower must not be used to install flash rubbish bins, architecturally unique toilets, or sculptures in the park.

Rubbish collection

We are comfortable with the existing system. We have very little rubbish needing to be collected: most of our waste goes into our compost bins. This is similar to other elderly folk, as expressed in the letter to the Editor of Taupo Times (final issue). Other, non-recyclable solid waste (cabbage tree leaves, broken crockery, old paint tins etc) we take to the Landfill (and pay). It is true that the current system is not perfect - animals rip the bags open, sharp objects sticking out can injure our collectors, and on windy days recycling items get blown out of the crates. However, although it may seem advantageous to have waste put in large wheelie bins collected by a mechanized system, we suspect there will be unintended consequences such as bins littering the berms outside holiday homes and becoming targets for vandalism. Furthermore, the collector is unable to see what unacceptable material is in the bin before it is emptied into the truck – likely leading to the whole truck load being rejected for recycling because it is “contaminated”. Our “rubbish boys” currently do a great job in sorting out unacceptable stuff at the kerbside. We do not have the space inside our garage for large bins, we would find rolling large bins challenging, and cleaning them out much more difficult than the present crates.

WE VOTE TO KEEP THE EXISTING SYSTEM + FOOD SCRAP BIN

We would be happy though with a fortnightly collection. Perhaps weekly in Summer and Holiday periods. Holiday home owners and temporary visitors (AirBnB, Rent-a-bach etc) can find out when rubbish is going to be collected by looking on the TDC website – every visitor renting a house has a smart phone these days.

Note that we were not impressed by the result of the Consumer rubbish tracking test (using a GPS), exposed on national TV, that showed an aluminium can going to waste rather than to recycling. We hope somebody was sent to the naughty corner.

Options for dealing with wastewater in Taupō North

We approve of a new wastewater plant in Taupō North, and for increasing the capacity of our wastewater connections in Taupō town across the Waikato River, funded by borrowing. Has Council considered or talked to Contact Energy about reinjecting treated waste water from such a plant into reinjection aquifers currently used by Contact, north west of the Waikato River ?

Another Waikato River crossing

A nice to have. However, if you read Danyl McLauchlan 's piece in the latest “Listener” (July 6-12 2024) you will see that very very few engineering projects in this country come in on or under budget. Unless planning, permissions, and completing the work is done within a year, I predict that the cost will be well north of \$100 million. The longer it takes the more the cost. You will no doubt say that this time frame would be impossible – Allied troops went from Normandy to Berlin in less time, against opposition.

NZTA funding changes

WE ADVOCATE REMOVING OR RE-PRIORITISING SOME TRANSPORT PROJECTS, OR CHANGING THE SCOPE OF THE PROJECTS TO MEET A SMALLER AVAILABLE BUDGET.

Water meters?

We approve of Council continuing to install water meters at new properties and for high water users and commercial users, and for the policy of using them to track water leaks. Although for the next few years, there is no intention to charge for water use for normal residential properties, it is not just the volume of water taken, *per se*, because it comes from an almost inexhaustible lake supply, but the fact that it is treated and this we presume is a significant cost per litre. We suggest that TDC follow some other councils in encouraging private residential owners to install water tanks to capture rainwater from the roof for use in the garden. TDC could make a bulk order, negotiate a discount, and onsell to locals wishing to put in a tank; Wellington or Porirua council have done this, which enabled us to get one via our daughter who lives in Tawa.

Waste Management and Minimisation Plan

WE APPROVE OF THE CHANGES PROPOSED IN THE WASTE MANAGEMENT PLAN, especially diversion of building waste. In our daily walks around Kokomea we see much useful building material put in a single bin along with real waste. Our grandparents used to say: *"Wilful waste brings woeful want"*. We cannot dump our way to prosperity.

Treasury Management Policy

We **DO NOT** approve of the proposal to change to Net External Debt/Total Revenue Borrowing Limit from 225% to 250%. Council already has a high debt burden. Council only recently revised its debt to revenue limit from 200% to 225% of operating revenue. In 2016 Taupo District Council was eighth in the top 10 borrowers, and the highest of all the towns. We have not been able to see where TDC sits now, but until that is revealed **WE OPPOSE ANY INCREASE IN THIS DEBT CEILING**. We detect an unwise *"borrow and spend, borrow and spend"* attitude. Borrowing in times of high inflation and interest rates is madness.

Housing

YES, TDC SHOULD USE LAND IT OWNS TO HELP EASE THE DISTRICT'S HOUSING CRISIS.

This is a continuing problem. We do not want Taupo to end up like Queenstown with an extreme shortage of rental housing. Actually, there is no shortage of houses - there is a shortage of *available* housing. In Rainbow Point, where we live, only about 10-15% of the houses are permanently occupied. We estimate that in the Rainbow Point to Secombe Park area there are likely 500 to 1000 houses lying vacant for most of the year. We do not have an answer for this, but there must be a solution, even if it involves TDC building and operating rental property in conjunction with a private developer, or a scheme such as outlined below.

We suggest that TDC NOT SELL ITS LAND but instead LEASE it, initially to a building Developer/Company then to the persons who buy a new house from this Developer/Company. Over 50 years ago this was how we (in our mid-twenties) got our first house, in Wellington. Covenants could be placed on the arrangement to ensure that low-middle income, owner-occupiers, get the houses; if they leave they have to sell and the covenant remains. It could also be that long-term (say 8-10 years) owners could then freehold the land at market value; Council then getting the advantage of rising property values.

OTHER MATTERS

Management of cats

To support the great community planting and pest trapping initiative led by Greening Taupo, we ask that TDC tackle the problem of cats (companion, stray, and feral). New Zealand is awash with cats. It is well established that cats are highly efficient predators, known to prey on native birds, lizards, and insects. We ask that controls around cats are included in the Animal Management Bylaw, and propose: a limit of three cats per household, microchipping, keeping cats inside at night, and compulsory de-sexing. There should definitely be regulations preventing the establishment and maintenance of feral and stray cat colonies, and action is taken against such colonies.

THIS IS A CAN THAT DOES NOT NEED KICKING DOWN THE ROAD.

Bulk purchase of electricity

We understand that large business corporations obtain, by negotiation, significant discounts on their cost of electricity. Why does TDC not negotiate a discounted rate for its residents and small businesses? This would likely mean resurrecting TEL. And why not – it would be advantageous to most of the ratepayers. It seems that Council is willing to get involved in far more risky business ventures (motor racing circuit) that advantages just a few business sectors.

Any other feedback?

Below is a copy of my 29 March 2021 to our Mayor and to Greg Hadley (who I was advised was head of Parks and Reserves).

While I have had some dialog with David for which I am appreciative, the problem remains unresolved; the Two Mile Bay Reserve remains a dust-bowl and is an eye-sore to the entrance to Taupo.

I am hoping that this issue could please be addressed in the near future.

Many thanks

Sally Stuart.

Subject: Two Mile Bay Reserve

Hello David and Greg,

We are residents in Mapou Road and have a solution for the Two Mile Bay Reserve.

The new walkway is fantastic, and the bollards encourage people to come and park and enjoy the beautiful surroundings.

The boat ramp is always going to be busy over the summer period and trailer parking is a necessary.

The poor reserve, however, is a constant dust bowl!

Per proposed plan attached, we believe the following changes would solve trailer parking issues and keep the reserve green.

If you sealed the drive through from the boat ramp, with a turnaround (at the Mapou/BBQ end), then put parking lines for cars (facing the lake) and trailer parking opposite those, on an angle. This, with the parking at the boat ramp would be ample for most of the year. Then, if you put bollards around the perimeter, with a chain access, you could then open the reserve up over the busy Christmas period by unlocking that chain access.

Re grassing (again!), with irrigation please.....?? and bollards, would give the reserve a chance to regenerate, and make this stunning entrance into our beautiful town a definite WOW factor.

We look forward to your thoughts.

Best wishes

Sally and Jock Stuart

Is there anything else you would like to tell us about this issue?

Keep it simple. Keep it low cost. The food waste and the glass will always require manual handling at the kerb; so the whole collection at the kerb cannot be automated. Therefore cheaper and simpler to keep it all manual. When a specialized wheelie-bin truck breaks down it becomes a major problem because the wheelie-bins are difficult to empty manually. Any common truck could be used temporarily to collect the yellow bags or collect the paper/plastic/glass within the existing system.

food scrap bins is a disgusting idea. Very unhygienic. Especially in summer time.

1.11 Any other feedback?

you guys have got to stop rates increases. Honestly its killing people. Inunderstand that it cant stay one price for ever but the increases are insanly big, far to regular and its simply not fair. Most households benefit nothing off alot of this stuff. Council services need to be more user pays funded not just rate payer funded.

What do you think we should do more/less of? (be specific)

more to make living in Taupo enjoyable. Keep large vehicles off residential roads restrictions should apply for times they can be used. Introduce more family inside things to do for when weather is bad. More tourist events on lake front. Stop iwi blocking access to certain parts of taupo. No more sculptures. More medical centre's to reduce wait times to see doctors.

1.4 Tūrangi Wastewater
Agree

1.4.4 Agree

Stop borrowing money for these projects. If the infrastructure project is a priority, then **save** for it, as a priority. Borrowing adds significant interest costs to the overall pricing of these projects and we are constantly being asked to pay more and more with little or no rise in our income.

1.6 Bag it or Bin it
Disagree

1.6.1 Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

I find the existing bins light and easy to handle and convenient to store in the garage. In contrast the large bins are unsightly, difficult to find storage space for and a bit unwieldy to handle.

1.7 Housing
Agree

1.8 Development Contributions
No

Is there anything else you would like to tell us about this strategy?

This is simply another rationale to leverage more money from people. We already pay for infrastructure costs in our rates. Remember? Water, sewerage, rubbish collection, parks, roading. These are the fundamentals that were always covered in the rates bill. Council seems to have forgotten this basic premise. Use the existing rates for the basic infrastructure purposes that we, as ratepayers have always expected you to do and stop

thinking up new reasons to add another levy, which is in essence another tax. No! Stop it!

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

Include the concept of a recycling plant in your waste minimization plans. This would have to be considered to be built in stages to keep development costs low but could incorporate the ideal of being both self funding and reducing environmental waste at the same time.

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

It is unfair and inconvenient for holiday home owners to be expected to pay for a wheelie bin which might only be put out occasionally. In Kuratau our collection day is on a Monday so the chances of us being there on any collection day - every 2nd week is remote. We then would also have the issue of getting our bin back inside if we put it out upon leaving at the end of a weekend visit. A wheelie bin left outside a property for a length of time would raise a security issue as it clearly signals people are not home. \$366 per year for a service we would hardly ever use seems unfair.

The current bag system allows us to pay as we use the system and if we are not there on collection day we can still drop the bag off at either the Kuratau transfer station or the Turangi transfer station on the way out of town to our permanent home.

The food waste system would be of little benefit to use for the same reasons as those above. Indeed we have a garbage grinder installed in our home sink so would continue using that.

I do not believe that wheelie bins provide an incentive for generating less rubbish. The 140 l bin is equivalent to more than 2 60 litre bags. A bag system applies in our home city and almost everyone using the system puts out only one bag at a time - weekly collection. Rarely are the bags damaged by dogs - indeed I cannot recall the last time that I observed a bag that had been damaged by a dog.

In summary we would suffer a decreased level of service for an increased price. Please stick with the bag system for rubbish. Perhaps small wheelie bins for non-glass recyclables can be justified as it would avoid the wind blown issue that currently arises with the open topped bins.

We have a holiday home at Kuratau, where it is only used very sporadically through out the year. So the current pay as you go option for bags is the only option that would work for us.

The rates are already costing alot more, as are the Insurance, Power and water. To add the cost of bins to all those other expenses, for them to be only used about 4-5 weeks a year is an extra cost we absolutely

cannot afford. The other issue for us, is that there is zero storage space to keep the bins. So they would just have to sit outside where they would be an easy target to be stolen or removed from the property. Or to

blow around the section in heavy winds. Also, not ideal.

1.6.1 Disagree
Disagree

Is there anything else you would like to tell us about this issue?

I already compost myself and it's very interesting to note that in some areas the rat population is increased to fold because people don't deal with their scraps correctly with the new bins

why change something that works? If it's cheaper to use bags then leave it as it is if it's going to cost the right pay in the long run to use bins for rubbish and food scraps then it's a no brainer. It has to be the cheapest option. Many people are already struggling to pay their rates and food. They don't need added costs on their rates .

1.7 Housing
Strongly Disagree

1.7.2 Strongly Disagree

Strongly Disagree

Is there anything else you would like to tell us about this issue?

there are so many houses in Taupo that have now been turned into bed-and-breakfast and book a batch and rentals. I have to disagree that we have a housing crisis. Those that have low socio economic homes already in Taupo. Don't look after what they've got. I would absolutely hate to see a new area near Wharewaka into a slum area not a good look for Taupo at all which is a tourist destination so I totally oppose cheap housing in a new housing area where people have paid over \$1 million for their homes

1.8 Development Contributions

No

Is there anything else you would like to tell us about this strategy?

1.11 Any other feedback?

I am absolutely shocked that the council would even consider increasing the fees for aqua aerobics nearly all the people that go are over 60 on pensions and should be 100% encouraged to get out and keep fit to keep the cost down. They should only be a charge for AQUA not a charge to use all the pool facilities and AQUA . I for one don't use any of the pool facilities I only go to AQUA . So I'm paying for 3/ quarters of an hour 2-3 Times per week, why should I pay any more if I'm not using the rest of the facilities?

The current system of prepaid rubbish bags is the most cost-effective option and fair option for ratepayers. It is user pays and encourages less rubbish - because you have to pay for every bag each week. Therefore we recycle more so we only use one bag max. How valid is the stated disadvantage that sharp objects injure the collectors? Perhaps issue them with appropriate PPE to minimise this risk.

As other districts have found with bins, the contamination of recycling increases as (some) people chuck all sorts of things in the bins (because the items are hidden from sight) causing the entire truckload to go to the landfill. The alternative is to employ 'bin cops' to randomly inspect recycling - both costly and ineffective.

Please dont change the current rubbish and recycling service - its not broken and doesnt need fixing. The

additional cost of the proposed option is any extra unnecessary burden on ratepayers

infrastructure, footpaths the need updating in the older suburbs for example. Treated water storage tanks surely with the added housing since the treatment plant was updated on taupo, must be a need for this in peak summer. Less advertising, but also congratulations to the efforts put in on informing via email in the last year well done. Dont think we need to focus on a new slogan. Love taupo is fine. Contractor safety i feel is getting a bit out of hand safety fence on spa road for new carpark across from tauhara bakery, encroaching on cyclists safety, cones while footpaths upgrade wharewaka on curb side metres away from works.

Submission Date: 02/07/2024

First name: Paul

Last name: Rankin

Would you like to present your submission in person at a hearing?

I do NOT wish to speak in support of my submission and ask that the following submission be fully considered.

Feedback

1.1 Local Community
Kinloch

1.2 Next 10 Years
Do less

What do you think we should do more/less of? (be specific)

Spend less which may well mean doing less. Rates have increased substantially in the past 2 years. Everyone is looking to cut costs and obtain value for money; if this means cutting some services then so be it. My rates have increased at well over 10% per year - this is not sustainable for me. Not too many council services evident in Kinloch.

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Agree

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Disagree

Is there anything else you would like to tell us about this issue?

I don't agree with the separate re-cycling of food waste. I've seen this in other areas in NZ and can see little benefit re separation - the whole system adds confusion, multiple bins and a complete mess on the streets. Significant overheads re separation that are inconvenient for many end users. Current system works well for me. Why would I want to pay significantly more for the same service.

1.7 Housing

Feedback

1.1 Local Community

Western bays (Omori, Kuratau, Pūkawa, Whareroa)

1.2 Next 10 Years

Do less

What do you think we should do more/less of? (be specific)

Less un-necessary projects which is increasing the cost of rates to rate payers such as cycle ways and the water front upgrade. Concentrate on necessities not wants.

1.4 Tūrangi Wastewater

Agree

1.5 Taupō North Wastewater

Agree

1.6 Bag it or Bin it

Strongly Disagree

1.6.2 Strongly Disagree

Strongly Agree

Is there anything else you would like to tell us about this issue?

If you are a holiday home owner, such as ourselves, we will not be able to use the bins as we will not be there to put them out and away. This then leans towards increased rates costs which we are getting no benefit from and we will still have to pay to take our rubbish to our local transfer station in Omori to dump it there so in theory we are paying twice to dump our rubbish.

1.7 Housing

Agree

1.8 Development Contributions

Yes

Is there anything else you would like to tell us about this strategy?

1.9 Community Funding

Yes

Please explain why you agree or disagree with these changes.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

1.10 Waste management and Minimisation Plan

No

Is there anything else you would like to tell us about this plan?

We agree with the foodscraps being removed, however do not want to have wheelie bins for rubbish collection as being holiday home owners this will be an additional cost that we will not benefit from.

1.11 Any other feedback?

The council needs to try and do as much as they can to reduce the additional burden on rate payers by increasing costs due to un-necessary spending and pet projects in this current economic crisis

1.2 Next 10 Years
Do less

What do you think we should do more/less of? (be specific) Stick to core services only.

1.4 Tūrangi Wastewater
Agree

1.5 Taupō North Wastewater
Disagree

1.6 Bag it or Bin it
Strongly Disagree

1.6.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

My household works hard to minimise our waste. We find the current rubbish disposal and recycling service more than adequate. We compost all our vegetable and food waste so have no need for a council run service. We average only 1 rubbish bag a month so much prefer the current "user pays" system.

Your proposed new waste management system would only encourage higher levels of waste and higher costs to dispose of that waste. It would also have a higher environmental impact.

I strongly object to your proposal as my family would be penalised through much higher costs than we currently pay for rubbish disposal. Your proposal penalises those households that work hard to minimise waste, that work hard to avoid unnecessary packaging, and compost their green waste!! I hope council votes against this proposal!

1.7 Housing
Strongly Disagree

1.7.2 Strongly Disagree
Strongly Agree

Is there anything else you would like to tell us about this issue?

Concentrate on core services...councils should not get involved in property development

1.9 Community Funding
No

Please explain why you agree or disagree with these changes.

I disagree with councils spending rates on community funding

1.9.1 Community Q2
No

Please explain why you support or do not support the proposed eligibility and assessment framework.

See above

1.10 Waste management and Minimisation Plan
No

Is there anything else you would like to tell us about this plan?

Please refer to my comments on your proposed new kerbside waste disposal services. I consider your plan will increase waste to landfill rather than minimise household waste. Why not try diverting some resources into community education in this area....minimising waste disposal is not rocket science!

Feedback

1.1 Local Community
Taupō

1.2 Next 10 Years
Do more

What do you think we should do more/less of? (be specific)

I would like to see more continued development and improvement of our Taupo parks and walkways/shared pathways. I have two specific ideas for Secombe Park in my Wharewaka community. 1. An extension of the widened shared pathway from its current terminus at Kowhai Drive to at least 4 mile bay. 2. Further post and rail fencing at Secombe Park to protect grass areas from consistent damage by cars doing skids, burn outs and donuts. In particular more fencing around the central flaxed and tree area in Secombe Park and also the grassed area down behind 5-13 Pokaka Cres (as you drive down into Secombe Park from Wharewaka Road - on the left). I have attached a photograph of Secombe Park. Suggested extra fencing is drawn in red. Regular areas of car damage are shown in yellow crosses.

Feedback

1.1 Local Community
Taupō

1.2 Next 10 Years
Agree with the plan

What do you think we should do more/less of? (be specific)

Three waters ongoing improvement to storm water, wastewater and drinking water. Support community groups such as Greening Taupo and Bike Taupo and many others etc who help get bang for buck. Planning well so the new subdivisions, are adding value to Taupo and cover cost of upgrading some of the infrastructure.

1.4 Tūrangi Wastewater
Agree

1.4.4 Agree

I get it, not much suitable land in that area, as much is old riverbed or has a pan layer. Guessing the Forestry not interested as they do in Rotorua? or too far away.

1.5 Taupō North Wastewater
Agree

1.5.4 Agree

I know the hapu do not want the wastewater to go over the awa. can it be treated and put on to land on the northern side. at some stage. Holding tanks is good but where and what's the chance of over flow and going into a stream, River or lake.

1.6 Bag it or Bin it
Strongly Agree

1.6.3 Strongly Agree

Bins are an awesome idea and fortnightly pickups. Will stop most of the rubbish we see on windy days and for picking it up.

Whakatane has a green bin as well, I know too much, just now. But just something to save people dumping weed sand them spreading into the reserves and side of the road.

1.7 Housing

Agree

1.7.3 Agree

Have you had a look at the simplicity living housing, they can build, low cost apartments and town houses. more bang for buck for the land. Please listen to the podcast or just ring Sam Stubbs he would be happy to talk to you an said they would give the plan if someone was interested in doing this as they need ones to sell also. [Simplicity Living](#) | [Simplicity](#)

1.8 Development Contributions

Yes

Is there anything else you would like to tell us about this strategy?

Totally agree if a new subdivision is going to overload existing infrastructure then the new subdivision developer, should pay for the upgrade.

1.9 Community Funding

Yes

Please explain why you agree or disagree with these changes.

Yes and once a year will save a lot of admin costs. Keep it simple but get bang of buck.

1.9.1 Community Q2

Yes

Please explain why you support or do not support the proposed eligibility and assessment framework.

Three keeps it simple and black and white.

1.10 Waste management and Minimisation Plan

Yes

Is there anything else you would like to tell us about this plan?

Yes, 60% is a great target. Where to next for a landfill, when this one is full?

1.11 Any other feedback?

Awesome work. Nga mihi nui.

Thank you for making the submission process pretty easy and with links.

I hope my comments are of use.

We compost food waste. We put out a rubbish bag once every six weeks. We do our utmost to avoid bringing plastic packaging to our household. We already pay high rates and our household of 2 does not wish to subsidize all those households which observably generate volumes of waste many times greater than we do. We have limited storage for a set of expensive and unwieldy wheelie bins.

Please delay this project for at least two years in consideration of many financially stressed ratepayers.

Wheelie bins are a good idea on theory, but in practice they get left on the street most of the time, are hard to store away and there are too many of them. In a block of flats or converted house there will be multiple bins per household all outside in the front yard or on the street.

We currently have to take our rubbish to a local collection point which we do by car - we do not want to have to wheel bins 500m to the collection point - especially in the rain.

Both suggestions are costly and this costly outweighs expected improvement. Maintenance and cost of the trucks to collect large bins is expensive i speak from experience. To purchase new trucks is costly,braking systems need to be constantly maintained due to excessive stop starting when picks are done.

Additional braking systems can be employed but are expensive excessive noise from braking and then accelerating while collecting. Older mratepayers would struggle to put bins on the road side.

Food waste bins have not worked,look at Auckland council mess. Bins end up costing ratepayers never used or blow all over the place on collection day. The system is not that broken leaveit alone stop wasting our money.

1.7.3 Agree

Don't make the streets narrower as most homes have 2+ cars. If homes are smaller also provide off street parking. Our neighborhoods look trashy with cars parked on the street causing hazards on these narrow streets.
